## 4. OPERATION AND PAIRING

- Open the rear cover and load the battery before you switch on the device
- Wait 5s-10s., then long press SET key for 5s-8s to start pairing (indicator blinks).
- Open "Smart Life" APP,click + on the upper right corner to add devices, select Sensors-Contact Sensor(Wi-Fi).
- Connect the smartphone to WIFI(2.4G only), enter the wifi password and start pairing according to the instructions (make sure your smartphone, door sensor and router are within a range of no more than 2m between each other)
- APP receives alarm notification when contact sensor is triggered. Enable the APP PUSH feature as per your smartphone settings which might vary by smartphone brands.

4

1. Open one end of the back cover

2. Open the other end of the back cover

## 5. INSTALLATION AND ATTENTION

1. Install the sensor(A) and magnet(B) separately.A should be put on the frame of door / window, while B, on the door / window.
2. LED indicator on the sensor blinks 1s when it's triggered.
3. Test the device and indicator before installation.
4. Please align the triangle symbols on both A & B when you install.

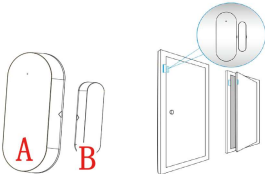

5

5. Distance between A & B should be no more than 2CM.

6. Please replace battery when the low power alert pops up in the APP.

7. Place of installation should be far from strong magnetic fields.

8. Installation methods : double-sided adhesive or screws.

6

## 6. SPECIFICATION

Product name	WIFI door window sensor
Battery type	2*AA batteries
Working voltage	3V
Network Type	2.4GHZ
Wifi band	802.11b/g/n
Standby time	10-12 months
Humidity	95%RH
Working temperature	-10℃~55℃

## FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
