FCC Statement:

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.

Wireless Charger + Ambient Lighting

100mm

Features:
10 watt wireless charging
ambient lighting
3 light intensity settings

Powering PowerStation:

Plug the USB-C end of the included power cable into PowerStation.

Plug the USB-A end into a power source with an output of at least 15 watts in order to achieve 10 watts of wireless charging.

Wireless Charging Status Light

If there is an error with wireless charging, the light will flash. This is typically when there is misalignment with the charging coils or if there is something between the device and PowerStation preventing it from charging.

100mm

Wireless Charging:
Place your wireless charging compatible device in the middle of the circle of PowerStation.

Align the center of your device with the center of the circle to ensure correct positioning.

You can charge devices such as earbuds, smartwatches, etc as long as they are compatible with standard wireless chargers.

The lighting will turn on when charging begins. You can now adjust the lighting using the button found next to the power cable.

When you remove your device off PowerStation the lights will turn off automatically.

The Charging Coil in devices is typically found in the back center.

Align this area with the center of PowerStation
