Instruction manual

Setting up ClearCharge

Use the included charging cable to plug ClearCharge into a USB power source (USB adapter, computer, power bank).

Wireless Charging

With ClearCharge plugged in, place your wireless charging-compatible device on top of the charging coil (screen-side up for smartphones).

Note: the wireless charging area is typically found in the back-center of a smartphone. Please refer to your device's user manual if you are having trouble finding the location.

When the alignment is correct, ClearCharge will light up and begin charging. The light will turn off when charging is complete and your device's battery is full.

Align the center of your phone, screen facing upwards, on top of the ClearCharge charging coil.

Troubleshooting

There should not be any metal items in between your device and ClearCharge while charging.

ClearCharge will flash 3 times if there is an error.

To remedy this, remove any interfering objects and try charging again. You can also try unplugging ClearCharge and replugging it in to reset it.

Exclusive Product Warranty Offer

This product is backed by a warranty that covers repair or replacement at our option. You must register by filling out the online form within 10 days of receipt of this product:

FCC statement:

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
