2. Connecting to pocketCloud

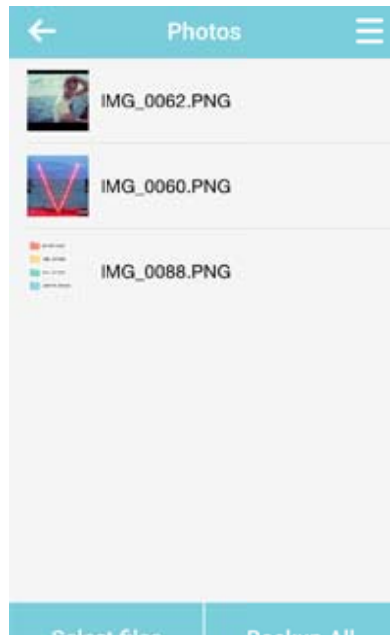

First turn on your PocketCloud. Next, go to the Settings on your smartphone or tablet. Find your WiFi Settings. Wait for your PocketCloud to show up as a network. Connect with password:**12345678** (You can change this later) Once connected, head over to the PocketCloud App.

3. Welcome to your PocketCloud App

This is the main screen of PocketCloud. Here you have quick access to your PocketCloud files, media on your device, the CloudCam and Quick Backup. CloudCam allows you to take photos and directly store them onto your PocketCloud.

4. Backing up your files

Simply browse your device using the Browse Phone icon on the main screen. You can go into the media folders and specifically Select Files or Backup All.

Troubleshooting

The PocketCloud app is not working properly.

Try force quitting the PocketCloud app.

iOS: Double tap the home button and swipe up to force quit the app.

Android: Tap the Task Switcher button and swipe left or right to force quit.

If problems persist, try restarting your phone or reinstalling the latest version of the app.

I can't connect my device to PocketCloud while charging.

You might be in Transfer Mode. Check the LED lights to ensure that Wi-Fi mode is on. If you are not, press the Power Button to switch modes.

How do I reset my PocketCloud?

If you are having some issues with your device, you can try resetting your PocketCloud by holding onto the Power Button for 10 seconds and then letting go. Once the lights turn off, you can now turn your PocketCloud back on.

I am having problems with the Wi-Fi connection.

If you are having connection problems, there is a pinhole on the side of your PocketCloud device that will reset the Wi-Fi configuration. Use a thin object such as a paperclip to reset the reset button. Your device name and password will be reset to default after the device restarts.
