- Italiano.....P083 – P102
- Русский.....P103 – P122
- Bahasa Indonesia.....P123 – P142
- 日本語.....P143 – P162
- 한국어.....P163 – P180
- Español.....P181 – P218

**Appearance**

**Packing list**

Please confirm if the camera and its accessories are in good condition after opening the package.

- Camera x1
- Base x1
- Positioning sticker x1
- USB cable x1
- Screw set x1
- Adapter x1
- User Manual x1

**USER GUIDE**

**1) Connect with power**

① Insert Power Line into Power interface which behind the camera. When the status indicator lamp turns green, shows the camera start working.

Note: please insert the Power Line horizontally to avoid damaging the USB socket due to rough pulling of the Power Line.

**2) Download 360 Smart Camera APP**

Please scan the QR code below, click the "Download the APP" and install on your phone.

**3) Add camera**

① Open 360 Smart Camera APP, click "register" button and start register an account. If you already have an account, login directly.

② After login, click "+" button which on the right-top corner of screen. Click on "connect to my camera" and follow the voice prompts to complete.

**4) Installation Type**

A:Table setting  
B:Ceiling installation  
C:Bracket wall-mounted installation (bracket supporting standard 1/4 nut shall be purchased by oneself)

**5) Camera Ceiling Installation Flow Map**

Notice:  
① The wall must withstand at least 3 times the weight of camera and its base.  
② To meet different kinds of demand for installation, you can buy an extended cable in on-line store or retailer shop.

**6) Steps for camera connection base**

① Aim the fixed groove at the bottom of the camera with the buckle on the base, follow the arrow at the bottom of the camera to rotate it counterclockwise until you feel a "click" on your hand, which means the installation is completed.  
② Similarly, follow the arrow at the bottom of the camera and rotate clockwise to the bottom until you feel a "click" on your hand, which means the camera is successfully removed.

**8) Motion Detect**

After the smart housekeeping function is enabled in Settings over the app, the camera immediately captures moving objects that pass through the surveillance area and records short videos. The app pushes the security messages simultaneously. After the smart tracking function is enabled in Settings over the app, the camera rotates with the moving parts that pass through the surveillance area and records tracking videos. It also pushes security messages as reminders.

**9) Auto Cruise**

Besides the intelligent panoramic cruise, the camera will also automatically cruise the point you cared most based on the spots you collected. You can easily and quickly check what happened in your house.

**10) Humanoid and face recognition**

After the "Humanoid and Face Recognition" icon is turned on in the live screen, the device marks humanoid and face in real time.

**11) One-tap call**

When you touch the Call button of the camera, the camera initiates a video call to the app and updates a voice message. Another family member can make a video call over the app.

**Product Description**

① 1080P (1920\*1080) high definition provides superb performances and bright luminosity. Night vision mode can be automatically activated as need and the viewing window will be switched to black/white mode.

② When night vision mode is switched on/off a clicking sound will be heard as internal filter changes.

**FAQ**

**1) How many modes does the indicator have?**

Constant Green Camera activated  
Flashing Green Configuring WiFi networks or offline  
Constant Blue Camera on-line  
Flashing Blue Video being viewed  
Constant Red Camera upgrading

Note: the manufacturer has the right to adjust the functions and status of the product by performing firmware update or software adjustment.

**2) Is it normal for the camera to run hot?**

Low level of heat is a normal phenomenon during working status. Working temperature may ranges from -5°C to 45°C.

**3) Announcements**

In order to get a better night vision imaging results, please don't put the camera in front of or close to the glass, white walls or other reflective objects, or you will see the picture bright in the vicinity and dark in the distance or white full of the screen.

**Correct Demonstration**

Avoid to be blocked the view of camera, please put the camera in the right way when on the table (pic. 1) or on the wall (pic. 2).

Notice: Do not twist the head of camera by your hand when switching on. You can use the APP to adjust if the lens position is not accurate.

**Important Statement**

**1) Personal information security**

To protect the information for you and your family, please make sure that the product you purchased was not bound by others without your permission. 360 Company always take strict measures to guard and protect the information safety of you and your family.

**2) Description of Hazardous material Contents**

Type and Name of Substances and Elements	Component			
	Plastic	Circuit board	Power cable	Adapter
Lead (Pb)	○	○	○	○
Mercury (Hg)	○	○	○	○
Cadmium (Cd)	○	○	○	○
Hexavalent Chromium (Cr(VI))	○	○	○	○
Polybrominated Biphenyls (PBBs)	○	○	○	○
Polybrominated Diphenyl Ethers (PBDEs)	○	○	○	○

This form is prepared in accordance with SY/T1364.

○ Indicates that for each item in this product, said hazardous substance is below the requirements set forth by the standard GB/T26572.

⊗ It indicates that the hazardous substance in at least one homogeneous material of this part exceeds the limit specified in GB/T26572. However, it satisfies limit requirements specified in the List of Exempt Applications of hazardous Substances Identified in the Management Catalog.

Note: A small patch of electronic components for special purposes is marked with "X" in the table (such as high voltage resistors, ceramic resistors, diodes), in which the lead content may exceed 0.1%. As the screws and the core in the data cables using alloy with better performance, the lead content may also be exceed 0.1%. These components are in accordance with the requirements of the exemption clause of the EU RoHS directive. Limited by the current global technology development, there are no other alternative technologies and components. The external lead contents of these components are in accordance with environmental protection requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) the device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Manufacturer's Name: Beijing Visual World Technology Co., Ltd.  
Address: 501 & 502, No. Building No. 2, No.6 Juxiangqiao Rd, Chaoyang District, Beijing  
Trade Mark: 360  
Product Name: 360 Smart Camera Pan-Tilt AI version  
Model number: AP1C  
Operating Temperature: 0°C to 45°C

This device is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU. All essential radio test suites have been carried out.

Detailed DOC file please visit our website: <http://www.360smarta.com>

- The device complies with RF specifications when the device used at 20cm from your body.
- Adapter shall be installed near the equipment and shall be easily accessible.
- The plug considered as disconnect device of adapter.

Model: A805A-0501001-EU1  
Input: 100-240V-50/60Hz/2A  
Output: 5V 1.0A  
Model: T8400G-0501000EU  
Input: 100-240V-50/60Hz/2A  
Output: 5V 1.0A

Care for the environment: Must not be discarded with household waste!

**RF Certification:**

Function	Operation Frequency	Max RF output power	Limit
2.4G-WIFI (802.11b/g/n)	802.110gH(20MHz) 2412-2472MHz	16.44dBm	20 dBm
	802.11n(40MHz)(2422-24.62MHz)		

This product can be used across EU member states.

**After-Sales Service**

**1) Warranty policy of 360 Smart Camera**

This product comes with a One-year Local Warranty Service. For detail of warranty service, please kindly contact local Authorized Distributors in your country.

**2) Non warranty policy of 360 Smart Camera**

① Cannot present valid warranty certificate and purchase invoice.  
② Damages caused by usage, maintenance, and storage which are not performed following the product user manual and damages caused by disassembly and repair which are not authorized by 360.  
③ Damages which result of force majeure  
④ Normal decoration and wastage during usage will not be included into warranty service.
