

ENGLISH – Instruction Manual

Wireless charger stand

Reference / color
W15.30L – black

Please read the instruction manual carefully before using the product.

Product Specifications

Item dimension: 100*70*130mm

Weight: 150g

DC input: DC 5V/3A

USB output 1: 5V/1A

USB output 2: 5V/1A

Wireless output: 5W

Working Frequency: 110kHz~205kHz

Wireless distance: \approx 8mm

Efficiency: 60%

The product includes a micro USB charging cable.

Key functions

Using your phone while charging it on the wireless stand charger can cause higher temperatures

Do not place or use this product near a source of high heat or in a humid environment.

Keep the product out of reach of children.

Using your phone while charging it can cause higher temperatures.

This product complies with European Directive 2002/96 / EC on waste electronic and electronic equipment (WEEE) and 2011/65 / EU on the use of certain hazardous substances in electrical and electronic equipment (RoHS).

FCC Statement

This device complies with part 15 and part 18 of the FCC Rules. Operation is Subject To the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not explicitly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 and part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help. The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected. This device complies with Part 18 of the FCC Rules. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Increase the separation between the equipment and any other radio device.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-
