

## **Congratulations on choosing the VistaCam 702**

You've taken the next step toward making your home safer and your life easier.

It's easy to set up your camera. Here's what you need to do.

1. If you haven't already set up your Vera controller, please do that first. There are instructions on how to do so accompanying the controller.
2. Plug in your VistaCam 702. When the LED begins blinking blue, it's ready to be added to your Vera system.
3. Follow the prompts in your Vera app to set up the camera.
4. That's it! Your VistaCam 702 has been set up. The LED will flash slowly confirming it is operating properly. The status LED can be turned off under the camera's settings.

### **Need help setting up?**

### **Regulatory Information**

Camera model **VistaCam 702** (SKU:VistaCam-702-US) is designed for indoor use.

### **FCC Information**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Note: This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This product generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help. Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment should be installed and operated with a minimum distance 20cm between the radiator and your body.
