4.4. FM radio

The phone comes with an in-built FM Radio. You can listen to FM radio stations, and add them to channel list. You have to plug in an earphone, as the antenna of the FM radio. You can listen to the radio either through an earphone, or through the speaker in the phone.

1	Radio on/off button
2	Record
3	Channel list
4	To fine-tune the FM frequency
5	To search for the next effective frequency

5. Tools

5.1. Calendar

Your phone has a calendar for managing your time schedule. You can use the calendar to keep track of important events. After entering the calendar function menu, you can select year, month and date.

5.1.1. To set the calendar view
① From your Home screen, touch launcher icon, then find it: Application menu > Calendar.
② Touch the date on the right corner of screen.
③ Select day, month or new event in the menu that opens.

5.1.2. To add a calendar event
① Touch New in the menu that opens.
② Enter the name, location, time, and description for the event.
③ Select a reminder for the event.
④ After you finish, touch √.

5.2. Clock

The clock allows you to view time and date. You can also view the other four function: Alarm, World Time, Timer and Stop watch.

5.3. Calculator

Using this application allows you to make calculations. The calculator provides the basic arithmetic functions; addition, subtraction, multiplication, and division.
① Touch Launcher icon, and from Application menu, touch Calculator.
② Touch the number pad, you can make calculations.
③ Slide by moving your finger left on the touch screen can switch to the advanced panel.

5.4. Wi-Fi Networks

Wi-Fi is a wireless networking technology that can provide internet access at distance of up to100 meters. To use Wi-Fi on your phone, you access a wireless access point, or "hotspot". Some hotspots are open and you can simply connect to them. Others are hidden or implement other security features, so you must configure your phone so it can connect to them.

TIP: Turn off Wi-Fi when you are not using it, to extend the life of your battery.

5.4.1. Connect to Wi-Fi Network.

① Touch Launcher icon, and from Application menu, touch Settings.
② Touch Network & internet > Wi-Fi.
③ Check Wi-Fi to turn it on. The phone scans for available Wi-Fi networks and displays the names of those it finds. Secured networks are indicated with a Lock icon.
④ Touch a network to connect to it.

If the network is secured, you are prompted to enter a password or other credentials (Ask your network administrator for details).

5.4.2. Receive Notifications

By default, when Wi-Fi is on, you receive notifications in the status bar when your phone detects an open Wi-Fi network.

① Turn on Wi-Fi, if it's not already on.
② In the Wi-Fi list screen, press Menu key to open Wi-Fi preferences, check Open network notification. You can uncheck this option to stop receiving notifications.

5.5. Bluetooth

Bluetooth is a short-range wireless communications technology that devices can use to exchange information over a distance of about 10 meters.

5.5.1. Turn Bluetooth On/O

① Touch Launcher icon, and from Application menu, touch Settings.
② Touch Connected devices > Bluetooth.
③ Check or uncheck Bluetooth to turn it on or off.

Important: Go to Bluetooth and check option so that your phone can be detected by other devices.

5.5.2. Pair with Bluetooth Devices

You must pair your phone with a device before you can connect to it. Once you pair your phone with a device, they stay paired unless you unpair them.

① Touch Launcher icon, and from Application menu, touch Settings.
② Touch Connected devices > Bluetooth.
③ If Bluetooth is not turned on, check Bluetooth to turn it on. Your phone scans for and displays the IDs of all available Bluetooth devices in range.
④ If the device you want to pair with is not in the list, touch SEARCHING.
⑤ Touch the ID of the desired device in the list to pair it.

---

6. Precaution

⚠	Please carefully read and observe the terms below: Safe power on Do not use your mobile phone where it is forbidden to use or you might cause a disturbance or danger.	🔧	Accessories and batteries Only use the authorized accessories and batteries and do not connect to incompatible manufacturers or products.
🚗	Safe transportation first Please observe all related local laws and regulations. Do not use your mobile phone while driving. Safe transportation should be considered first when driving.	💧	Waterproof Your mobile phone is not waterproof. Please keep it away from water.
⚠	Disturbance All mobile phone performances might be disturbed.	🗂	Backup Remember to make a backup or keep a written record of all important informati on saved in your mobile phone.
⊕	Turn off when in the hospital Please follow related limitations. Please switch your mobile phone off when near a medical instrument.	🔩	Use qualified after sales service Only a qualified technician can install or repair your mobile phone. Please contact the authorized service center in case of phone failure.
✈	Turn off on an airplane Please follow related limitations. Do not use your mobile phone on an airplane.	✅	Proper use As described in this manual, your mobile phone can be used only in the correct location. If possible, please do not touch the antenna area of your phone.
⛽	Turn off when at a gasoline station Do not use your mobile phone at a filling station or around fuels or chemicals.	🌐	Connect to other devices Please read the user manual of the device to get more detailed security instructions before connecting to other devices and do not connect to an incompatible product.
💥	Turn off around exposure Area Please observe related limitations and do not use your mobile phone near an area where explosions can occur.	SOS	SOS emergency calls Make sure your mobile phone is switched on and in a service area. In idle mode, input the SOS number, then press the Dial Key. Advise where you are and do not hang up without permission.

Note:

--Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions. Return waste and used batteries to the supplier or specified recovery site.

Do not attempt to dry Phone with an external heat source, such as a microwave oven or hair dryer.

7. Warning

Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

--Reorient or relocate the receiving antenna.

--Increase the separation between the equipment and receiver.

--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

--Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This Mobile phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6W/kg averaged over one gram of tissue. Device types: X573 (FCC ID: 2AIZN-X573) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.37W/kg and when properly worn on the body is 0.98W/kg. This device was tested for typical body-worn operations with the back of the handset kept 10mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 1.0cm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
