Re: FCC ID: 2AJ3810233

To Whom It May Concern:

The following application is submitted on behalf of our client, Yardarm Technologies, Inc., for evaluation of their model BA10233 for certification under FCC Part 15.247.

The BA10233 is a Bluetooth Low Energy radio device that senses the insertion and removal of a firearm in a holster. Once a firearm state change has been detected, the Bluetooth Low Energy radio transfers this information to a host device.

The BA10233 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'.
