Possible reasons that device can not be added

- 1) Please check device is whether powered on.
- 2) Smartphone whether could connect to WiFi
- 3) whether the device is in the state to be configured. Before the configuration, let device enter the state to be configured. And Ez and AP mode, the status can not be confused.
- 4) Attention: every time the device is to be added, you need to reset the device to let it enter the Wi-Fi configuration state, and to ensure that the router has been working properly.

Check router::

- 5) When adding device, check whether Wi-Fi password is correct.
- 6) if the home router is a dual band router, chose 2.4G network to add device, while Wi-Fi need to open the radio, can not be set to hide.
- 7) Wireless router settings: encryption mode to be set to WPA2-PSK type, authentication type AES, or encryption and authentication types are automatic. Wireless mode cannot be 11n only.
- 8) To ensure good Wi-Fi signal, the distance between the device and the router shall not be too far.
- 9) whether the number of access equipment has reached the upper limit of the router , may try to turn off wifi function of some device for configuration.
- 10) Router to open the wireless MAC address filtering, it should first remove the device out of the router MAC filter list, to ensure that the router does not prohibit the device network.

Federal Communications Commission (FCC) Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generate, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

RF exposure warning

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

The device complies with the RF specifications when the device is used near your at a distance of 20.0 cm from your body. Keep your device 20.0 cm away from your body to meet the requirement earlier mentioned.

Thank You

Remark:

1) The pictures used in this manual are iOS App interface, Android version is a bit different

2) Product and software update periodically, the number and App interface in this manual are only for example. No extra notification on further changes
