

In the box:

- 1 TACTOSY Controller
- 1 TACTOSY Band
- 1 Micro-B USB Charging Cable

Description:

TACTOSY consists of the array of 20 coin vibration motors and has innovative adjustable structure that can easily equip on user's arms and legs and offer a tight grip on them. It has wireless module with battery inside but weighs less than 200g, offering maximum comfort and freedom of movement to users. Furthermore, the motors are placed that they have space in between each other but TACTOSY delivers smooth and continuous tactile feedback with self developed algorithm. With this algorithm, we could stimulate numerous types of tactile feedback regardless of number and placement of motors.

- 1. On/Off Switch
- 2. USB Charging Port
- 3. Vibration Motors Array

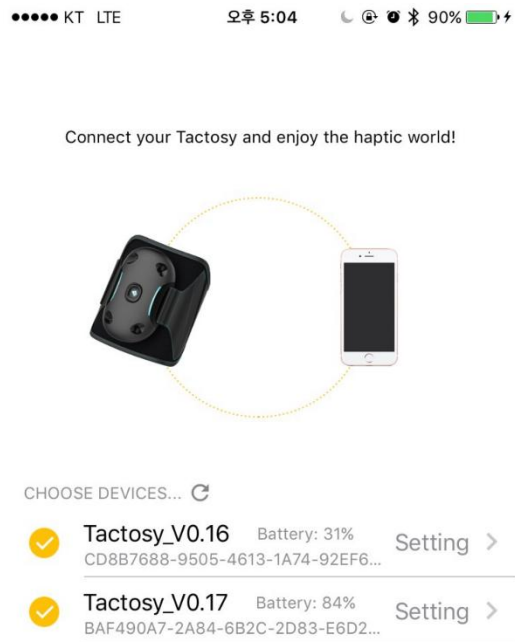

LED Indication:

- Red : Charging in progress
- Green (blinking) : TACTOSY is waiting for connection via BLE
- Green (on) : TACTOSY is ready for operation

Operation example on iOS:

1. TACTOSY connection management page.

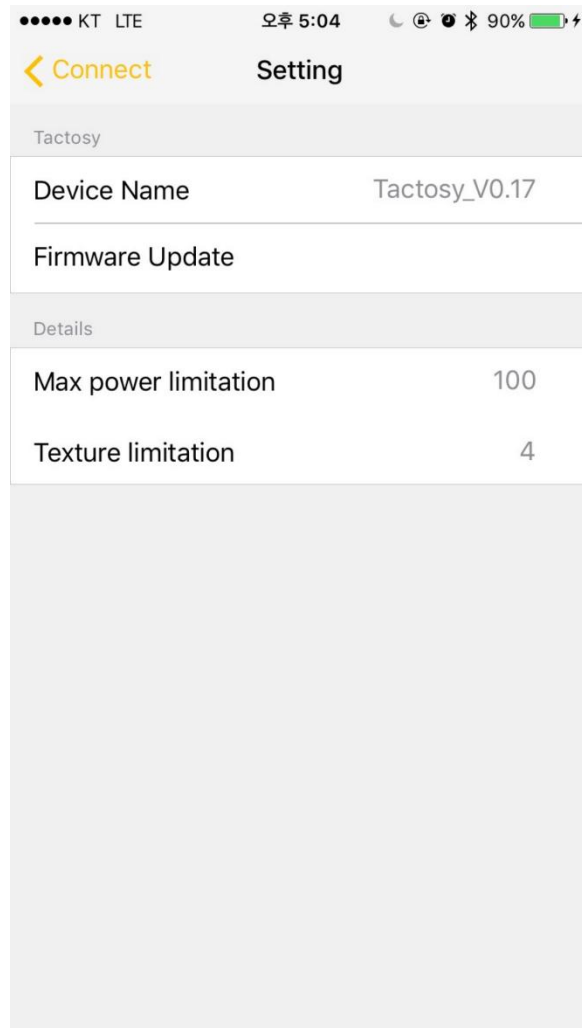

2. TACTOSY configuration setup page

2-1. firmware update,

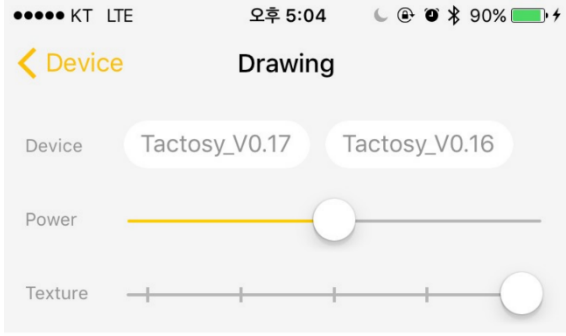

2-2. maximum power

2-3. limitation of texture: Texture controls the smoothness of Haptic feedback on Path mode.

3. TACTOSY drawing.

After connecting to detected TACTOSY with 'Done' button, you could experience Haptic feedback with two different modes: Path Mode and Dot Mode.

Path Dot

FCC Information to User

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution

Modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Compliance Information : This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

IMPORTANT NOTE:

FCC RF Radiation Exposure Statement:

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
