Object: Declaration of just different naming between WEM-200/US and WEM-200/32

SKF France declare that both products (WEM-200/US and WEM-200/32) are similar in terms of HW (Chip RF and all components), SW and all architectures for measurements.

The only difference is the diameter of baseplate (please see below the picture the diameter). Because, one product will be mounted in the wheel of BUS and the other one will be mounted on the wheel of Trucks (see below the .
