

## RF Exposure evaluation

The minimum distance from antenna to user hand (call button) is 6 cm. According to KDB 447498 D01 General RF Exposure Guidance v06, Appendix B, SAR Test Exclusion Thresholds for 100 MHz - 6 GHz and > 50 mm 450 MHz, 60mm, SAR Test Exclusion Thresholds is 254 mW > 180 mW (measured conducted power)

Then SAR evaluation is not required
