Tip
 Bluetooth Signal is easily interfered in the following environment:
 1. Complex environment with multiple Wi-Fi signals and Bluetooth signals.
 2. Airport, railway, metro where electromagnetic interference is strong.
 3. Crowded Bluetooth technology scenes guarantee synchronization of pairing and video playing.
 4. Using car, the microphone of the earphone may be blocked by water, sweat, oil, etc., which will affect the voice transmission effect, or you may hear someone's voice talking nearby.
 In these cases, it is suggested to use a dry or clean soft cloth to clean the earphone or dry it to restore.

FCC Caution: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference from authorized radio communication systems.
Notice: Changes or modifications not approved by the manufacturer may void the warranty and void the user's authority to operate the equipment.
Notes: This equipment has been tested and found to comply with the requirements for Class B digital devices, pursuant to part 15 of the FCC Rules. These devices are designed to provide reasonable protection against harmful interference in a residential environment. This equipment generates, uses and can radiate radio frequency energy and, if not used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If you experience interference, you are encouraged to try to correct the interference by one of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Move the equipment away from electronic equipment.
 - Plug the equipment into a different outlet.
 If you cannot eliminate the interference, you may wish to contact the manufacturer for more information.
