

10. SETUP PHOTOS

RADIATED EMISSIONS MEASUREMENT SETUP	
 A photograph showing the measurement setup from a front-left perspective. A white styrofoam block with the number '11360398' is on a turntable. A laptop is on a stand to the left, and a piece of equipment is on top of the block. The chamber walls are lined with absorbers.	 A photograph showing the measurement setup from a back-right perspective. The white styrofoam block with '11360398' and a blue cross is on a turntable. A laptop is on a stand to the right. The chamber walls are lined with absorbers.
 A photograph showing the measurement setup from a front-left perspective. A red circular antenna is positioned in front of the white styrofoam block with '11360398' and a blue cross. The chamber walls are lined with absorbers.	 A photograph showing the measurement setup from a back-right perspective. A piece of equipment is on top of the white styrofoam block with '11360398'. A red circular antenna is visible in the background. The chamber walls are lined with absorbers.
 A close-up photograph showing the measurement setup from a front-left perspective. A laptop is on a stand in front of the white styrofoam block with '11360398'. The chamber walls are lined with absorbers.	 A close-up photograph showing the measurement setup from a back-right perspective. A piece of equipment is on top of the white styrofoam block with '11360398'. A red antenna is visible in the background. The chamber walls are lined with absorbers.
