

<b>ENGLISH</b>
<b>2.4 GHz Wireless Headphones</b>
<b>Pairing Instructions</b>
1. Insert the dongle in the socket located on the left side of the system box and turn the detector on.
2. Switch the on-off button located on the right side of the headphones to 'on' position.
3. The blue LED on the left side will start blinking fast.
4. For channel selection, push and hold the trigger switch forward and press the down button simultaneously. Each time you press the down button, channels will change between 00-05.
5. When the pairing is successful, the audio will be heard through the headphones and the blue LED will start blinking slowly.
6. To adjust the volume, use the on-off/volume knob on the device.
7. Once the pairing is complete, the headphones and the device will connect automatically at the next start-up.
8. If the pairing is not successful after you remove the dongle and insert it again, repeat the channel selection process above.
<b>NOTE!</b>
1. If the connection is lost during pairing, turn off and restart the device and the headphones and repeat the process.
2. If the disconnection continues, turn off the device and the headphones and remove the dongle.
3. Insert the dongle again in its socket and repeat the above process.
<b>Charging</b>
1. Insert the supplied charging cable into a USB socket (PC, adaptor etc.)
2. Insert the other end into the charging jack on the headphones.
3. During charging, the LED next to the charging jack will light up red.
4. Charging will last approximately 4 hours.
5. Upon completion, the LED will light up green.
<b>Technical Specifications</b>
Frequency: 2.4 GHz
Audio Output: Mono
Battery: Li-Po
Battery Life: 14-20 hours
Charging Time: Approximately 4 hours
Transmission Range: 10 meters (33ft.)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
