

M8-LTE/M9-LTE

Waterproof rugged smart phone

QUICK-START USER GUIDE ANDROID 5.1

PRECAUTIONS

On the Road

Using a device while driving is illegal in many countries. Please refrain from using your mobile while driving.

Near Sensitive Electronics or Medical Equipment

Don't use your device near sensitive electronic equipment - particularly medical devices such as pacemakers - as it could cause them to malfunction. It can also interfere with the operation of fire detectors and other automatic-control equipment.

While Flying

Your device can cause interference with aircraft equipment. So it's essential you follow airline regulations. And if airline personnel ask you to switch off your device, or disable its wireless functions, please do as they say.

At a Petrol Station

Don't use your device at petrol stations. In fact, it's always best to switch off whenever you're near fuels, chemicals or explosives.

Making Repairs

Never take your device apart. Please leave that to the professionals. Unauthorized repairs could break the terms of your warranty. Don't use your device if the antenna is damaged, as it could cause injury.

Around Children

Keep your mobile out of children's reach. It should never be used as a toy as this is hazardous.

Near Explosives

Turn off your device in or near areas where explosive materials are used. Always obey local laws and turn off your device when requested.

Emergency Calls

To make an emergency call your device must be turned on and in an area where there's network coverage. Dial the national emergency number and press "Send". Explain exactly where you are and don't hang up until help has arrived.

Working Temperature

The working temperature for the device is between 0 and 40 degree Celsius. Please don't use the device outside the range. Using the device under too high or too low temperature

might cause problems.

At very high volume, prolonged listening to a mobile device can damage your hearing.

1. PARTS AND BUTTONS OF THE DEVICE

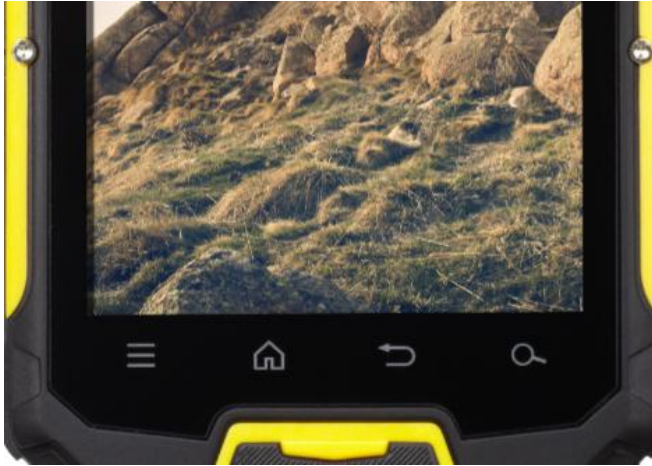

2. TOUCH BUTTONS

The  button will search from browser directly

The  button moves back one step to the previous menu/page.

The  button returns immediately to the main screen.

The  button will launch the applications and settings menu.

3. GETTING STARTED

Installing the SIM Card and Battery

Switch off your phone before installing or replacing the battery or the micro-SIM card.

Insert your fingernail into the slot at the bottom left of the back cover, and slide fingernail across bottom of back cover to lift it off.

WARNING!

To avoid damage to the phone, do not use any other kind of SIM card, or any non-standard micro-SIM card cut from a SIM card. You can get a standard micro-SIM card from your service provider.

Insert the battery by aligning the metal contacts on the battery with the metal contacts in the battery compartment. Gently push down on the battery until it clicks into place.

Align the back cover with the back of the phone and press the cover back into place. Ensure that all the tabs are secure and there are no gaps around the cover.

4. HOME SCREEN

The home screen will look similar to the picture below. To switch between screens, simply slide your finger up across the display.

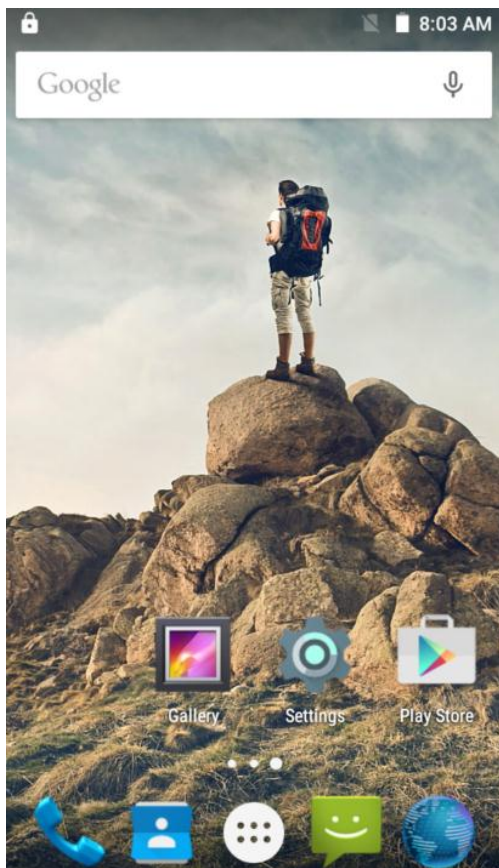

The home screen contains shortcuts to your most-used applications and widgets.

The status bar displays system information, such as current time, wireless connectivity and battery charge status.

5. QUICK NOTIFICATION PANEL

When you receive a notification you can quickly view it by following the below instructions. Slide your finger from the top of the screen down to the center to access Notification Panel to see your notifications.

Drag the notification menu down to display the second fast access menu, the menu will look similar to the below image.

Through this menu, it is possible to modify the functions such as brightness, auto rotation, Wi-Fi, Bluetooth and more.

6. SETTINGS MENU

The settings menu allows you to adjust Tablet **cell phone** System Configuration.

To Change Settings:

1. Touch the “Settings” menu icon on the Application menu. The Settings menu will open.
2. Touch a category title to view further options on the right side of the screen.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Specific Absorption Rate (SAR)

Information

SAR tests are conducted using standard operating positions accepted by the FCC with the Phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone While operating can be well below the maximum value, in general, the closer you are to a Wireless base station antenna, the lower the power output. Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each the FCC that it does not exceed the exposure limit established by the FCC, Tests for each required by the FCC. For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 10 mm from the body. Non-compliance with the above restrictions may result in violation of RF exposure guidelines.
