Model No. A02010

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's warranty coverage. This equipment has been tested and found to comply with the requirements for a Class B digital device pursuant to Part 15 of the FCC Rules. These rules are designed to provide reasonable protection against harmful interference in a residential setting. This equipment operates on a non-licensed radio frequency energy and it may not be used in conjunction with the following: (a) any other licensed radio frequency communication; however, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to another electronic device, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Thank for choosing us!
