The following function keys need to be combined with the FN key.

Specifications

Product Name: Crazy Keyboard Charging time: 3-4 hours
Model No.: BCI003/2.9/1/BCI003/1.1 Working time: >45 hours
Operating Distance: Radio: 10 meters Standby time: >30 days
Capacity: 500mAh (7.71Wh) Product size: 250*120*20mm(BCI003)
Input: USB-C to USB-C Weight: 100g(BCI003) 75g(BCI004)

Safety Precautions

- To preserve battery lifespan, use and recharge at least once every 4 months.
- Use original or certified cables.
- Do not expose to liquid.
- Do not disassemble.
- Avoid overcharging.
- Avoid extreme temperatures.
- Do not leave for a long time during charging.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause interference to radio communications. It is the responsibility of the user to obtain clearance from the FCC before changing the default settings, which may be accomplished by turning the power off and on, the user is encouraged to consult the manufacturer's user manual for the correct procedure.

To prevent interference to other users, the equipment should be used in accordance with the following conditions:

- The equipment must be used in a shielded environment to prevent the radio frequency energy from interfering with other users.
- The equipment must be used in a shielded environment to prevent the radio frequency energy from interfering with other users.
- The equipment must be used in a shielded environment to prevent the radio frequency energy from interfering with other users.
- The equipment must be used in a shielded environment to prevent the radio frequency energy from interfering with other users.
- The equipment must be used in a shielded environment to prevent the radio frequency energy from interfering with other users.
- The equipment must be used in a shielded environment to prevent the radio frequency energy from interfering with other users.
- The equipment must be used in a shielded environment to prevent the radio frequency energy from interfering with other users.
- The equipment must be used in a shielded environment to prevent the radio frequency energy from interfering with other users.
