

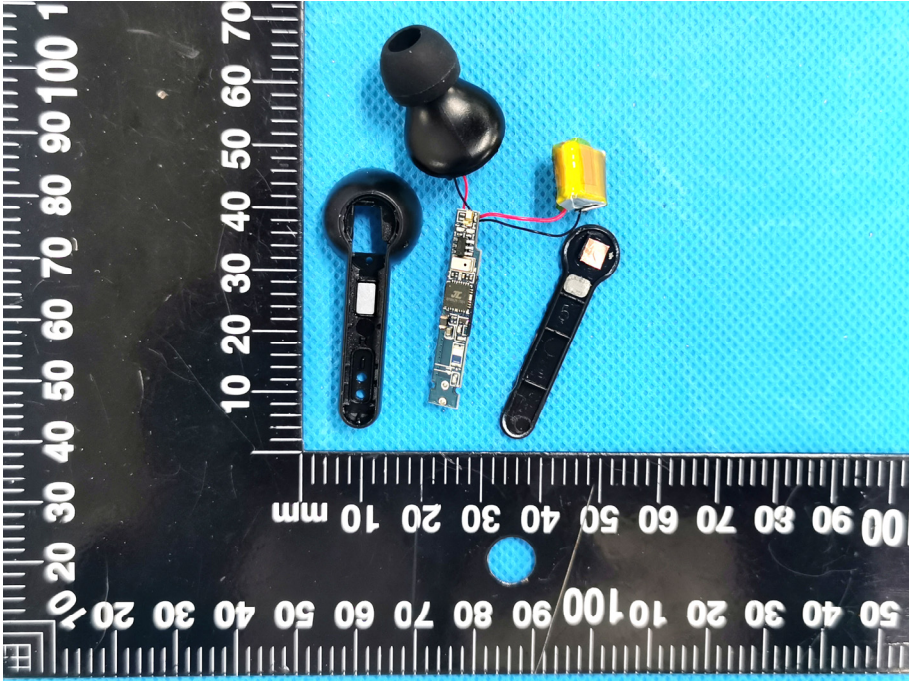

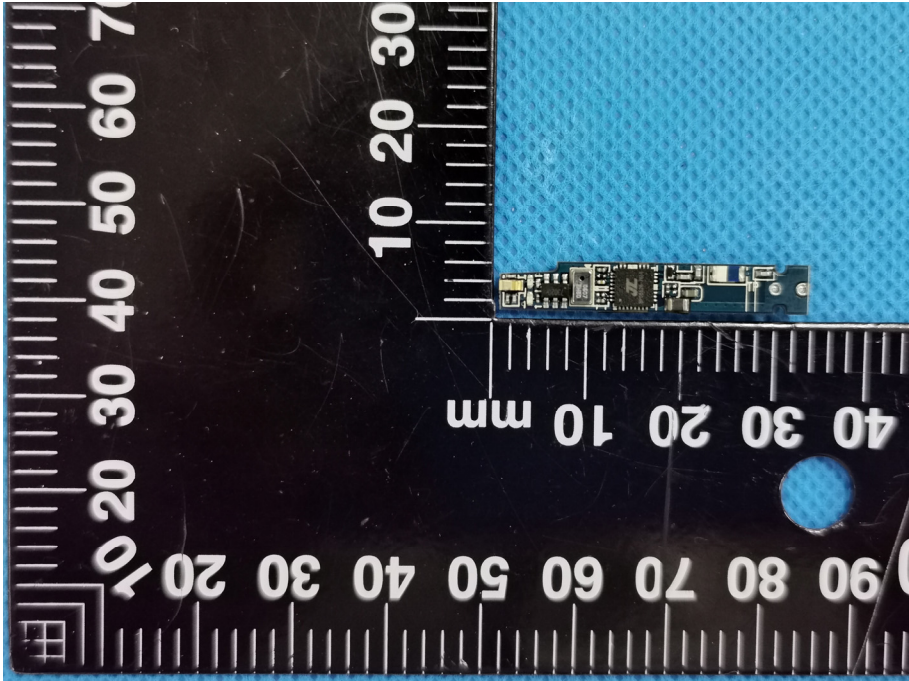

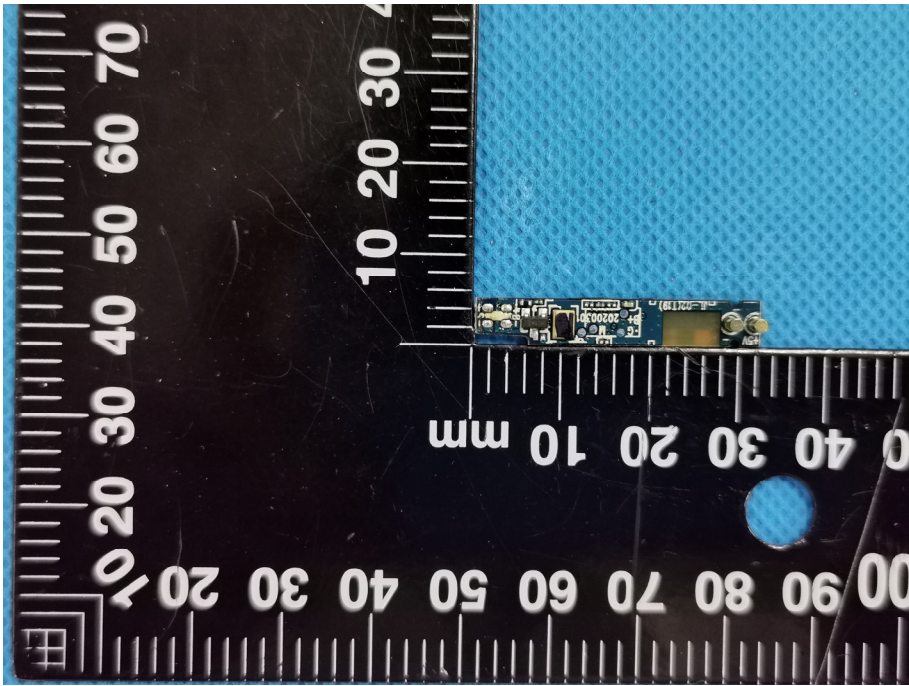

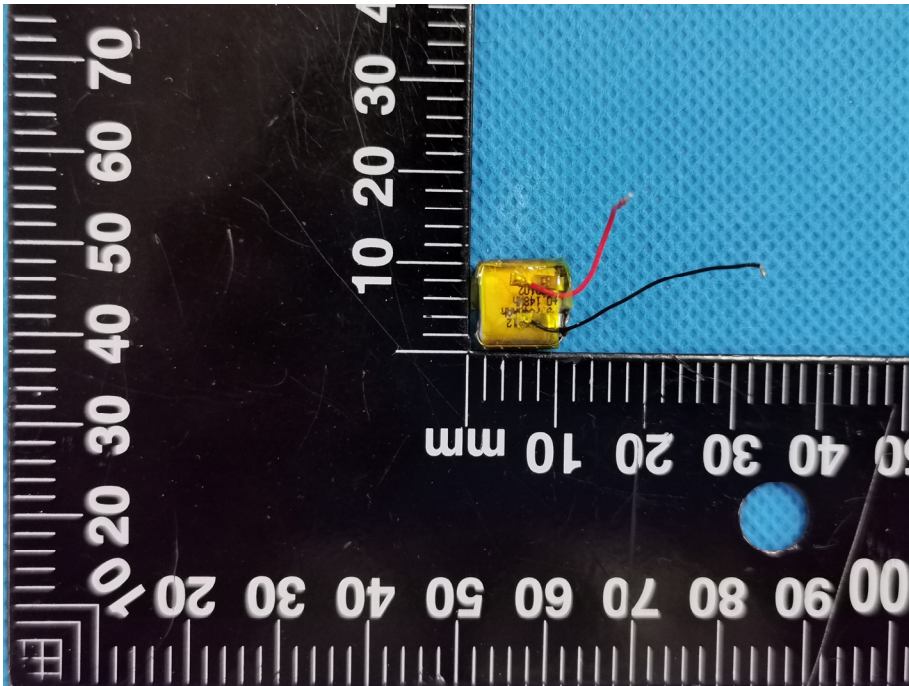

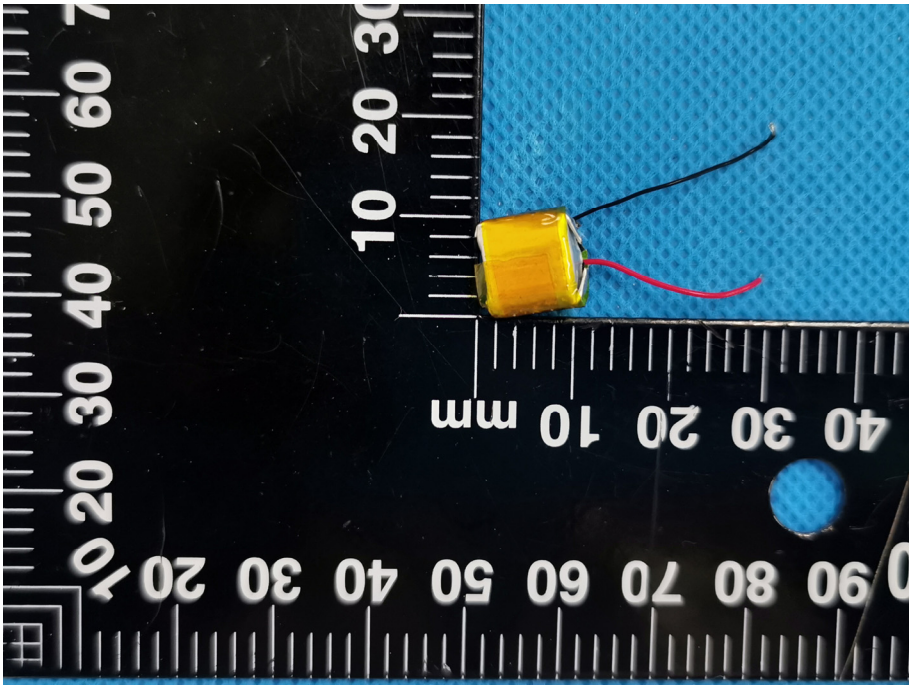

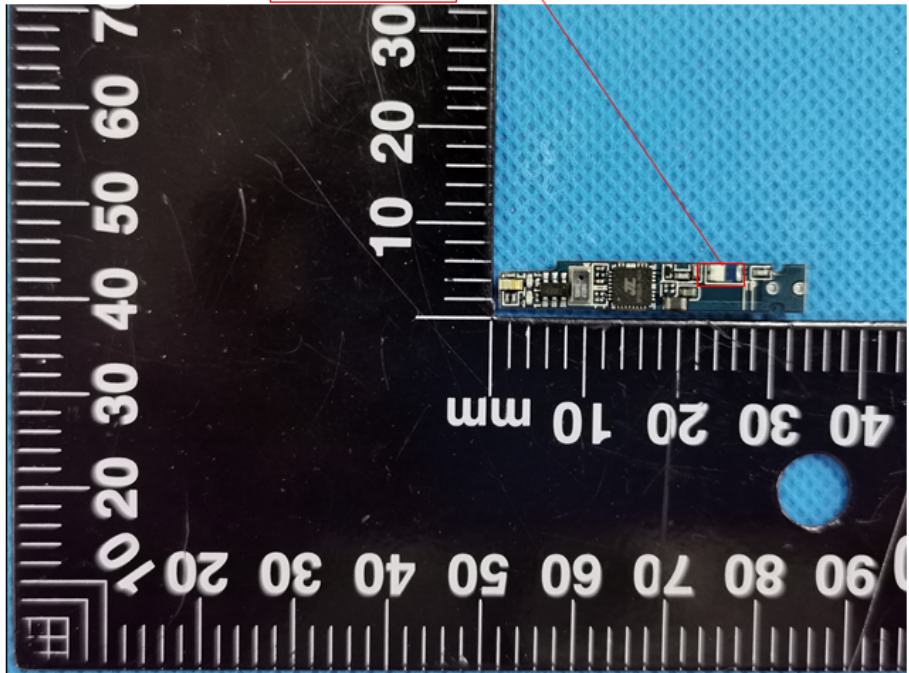

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 A photograph showing the internal components of an EUT. On the left, a black plastic housing with a circular opening is visible. In the center, a small green printed circuit board (PCB) is connected to a yellow cylindrical component and a black plastic component. A black spherical cap is also present. A black ruler with white markings is placed below the components for scale, showing measurements in millimeters.
<p>Solder Board-Component View 1</p>	 A close-up photograph of a soldered board component. The component is a small green PCB with various electronic components and solder joints. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters.

<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph showing a small blue printed circuit board (PCB) component mounted on a larger blue PCB. The component is positioned near a circular hole in the board. A black ruler with white markings is placed below the board for scale, showing millimeter and centimeter increments. The background is a blue textured surface.
<p style="text-align: center;">Solder Board-Component View 3</p>	 A photograph showing a small yellow cylindrical component, likely a capacitor, mounted on a blue PCB. Two thin wires, one red and one black, are attached to the component. A black ruler with white markings is placed below the board for scale, showing millimeter and centimeter increments. The background is a blue textured surface.

<p>Solder Board-Component View 4</p>	 <p>A photograph showing a yellow cylindrical component, likely a battery, mounted on a blue textured surface. The component is connected to two thin wires, one black and one red. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters. The ruler is oriented vertically, with markings from 0 to 70 mm visible.</p>
<p>Antenna View</p>	 <p>A photograph showing a small, rectangular blue printed circuit board (PCB) component, identified as a BT Antenna, mounted on a blue textured surface. The component has several small components and traces on its surface. A red line points from a label "BT Antenna" to the component. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters. The ruler is oriented vertically, with markings from 0 to 70 mm visible.</p>
