

Date: **October 23, 2018**

## **Statement and explanations**

According to the “Product Equality Declaration” (see attachment) from HMD Global Oy, the only difference between TA-1074 and TA-1049 is TA-1049 is dual sim product and TA-1074 is single SIM product.

Based on this, we do test for model TA-1049, and reused the test data for TA-1074 for FCC certification respectively. We think it is reasonable and acceptable

Should you have any question or comment regarding this matter, please have my best attention.

Sincerely yours,

---
