

DFS Client Declaration Letter

Date:21/01/2022

We have declared below featured for device,

FCC ID: 2AJOTTA-1520

IC: N/A

(1) DFS Device

Master

Client with Radar detection capability

 \square Client without radar detection capability

Frequency	Scanning Plan	Ad Hoc Mode	Access point	WiFi Direct	WiFi Direct
Band (MHz)		Capability	Capability	Group Owner	Group Client
2412 - 2462	Active and	No	Yes	Yes	Yes
	Passive				
5180 – 5240	Active and	No	Yes	Yes	Yes
	Passive				
5260 - 5320	Passive	No	No	No	Yes
5500 - 5580	Passive	No	No	No	Yes
5660 - 5700	Passive	No	No	No	Yes
5745 - 5825	Active and	No	Yes	Yes	Yes
	Passive				

(2) Active / Passive Scanning, ad hoc mode access point capability

(3) Country code selection capability to end user- \Box Yes, \boxtimes No

If yes, please explain how it was implemented: (please also help to provide detail of options for each country selection)

(4) Transmission in 5600 MHz to 5650 MHz is notched - \Box Yes, \boxtimes No

(5) Meet Part 15.202 requirement - 🛛 Yes, 🗌 No

A master device is defined as a device operating in a mode in which it has the capability to transmit without receiving an enabling signal. In this mode it is able to select a channel and initiate a network by sending enabling signals to other devices.

A client device is defined as a device operating in a mode in which the transmissions of the device are under control of the master. A device in client mode is not able to initiate a network.

(6) For client devices that have software configuration control to operate in different modes (active scanning in some and passive scanning in others) in different bands (devices with multiple equipment

classes or those that operate on non-DFS frequencies) or modular devices which configure the modes of operations through software, the

application must provide software and operations description on how the software and / or hardware is implemented to ensure that proper operations modes cannot be modified by end user or an installer. Apply, Not Apply, (If apply, please help to provide explanation on it was implement, and how software was controlled).
