

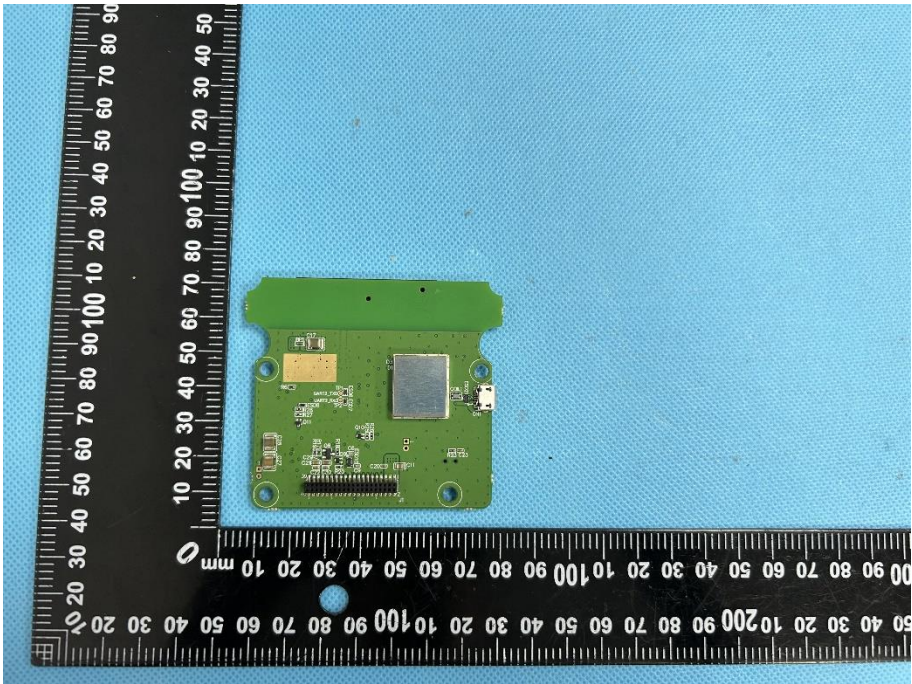

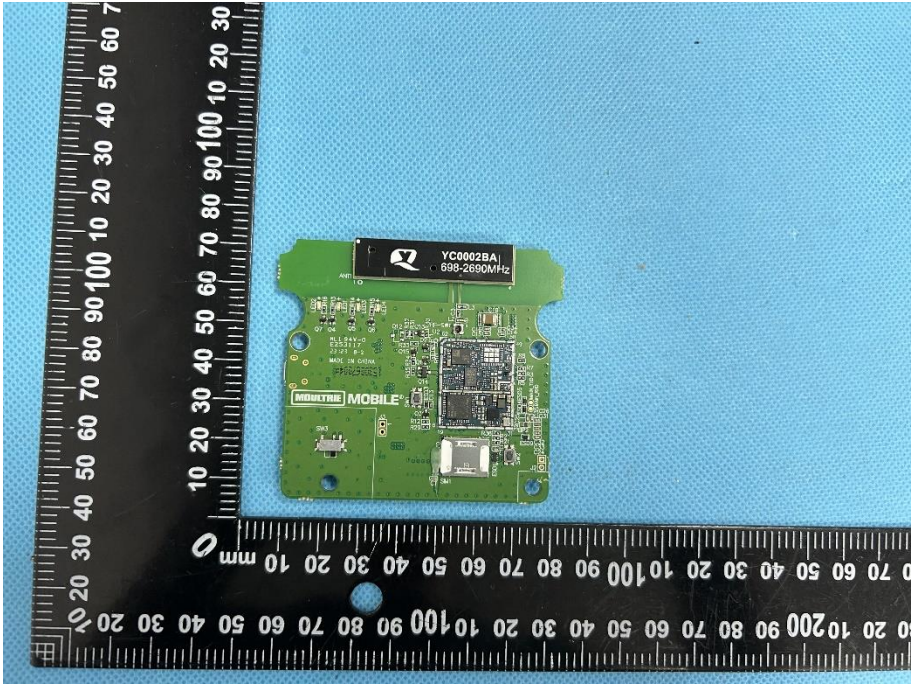

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

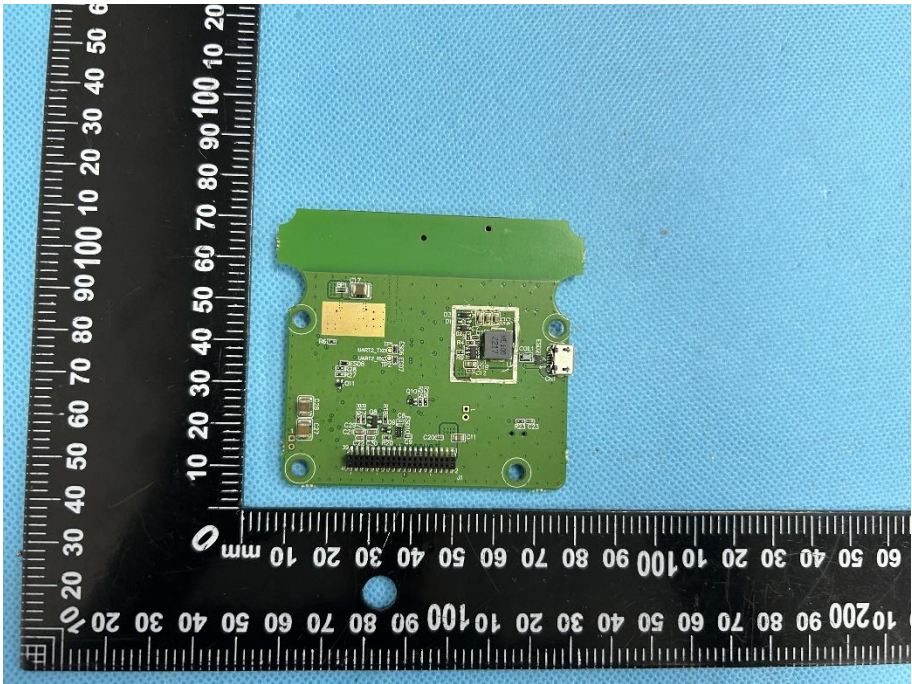

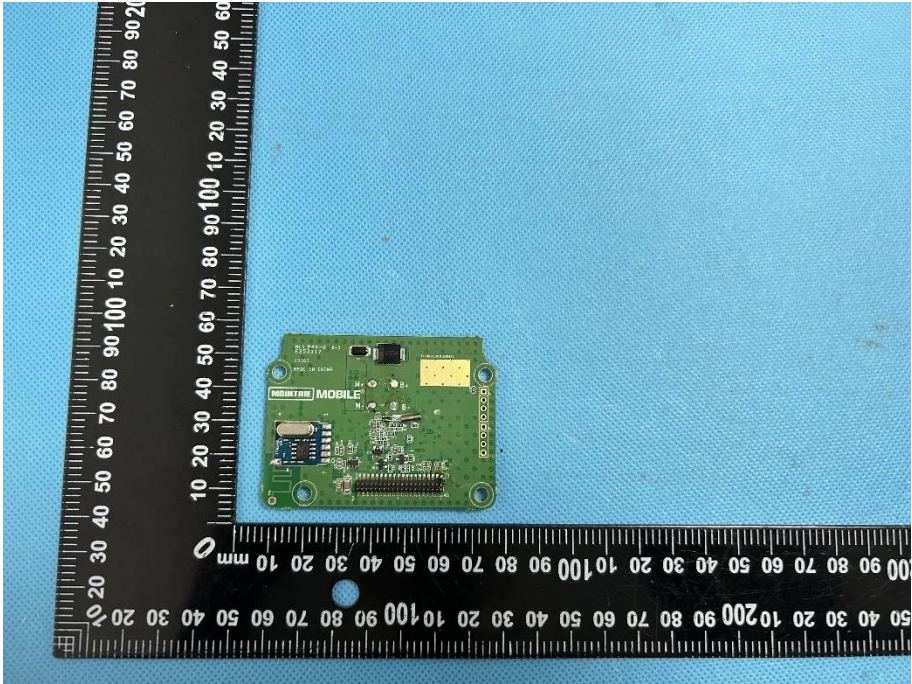

**EUT Housing and
Board View 1**

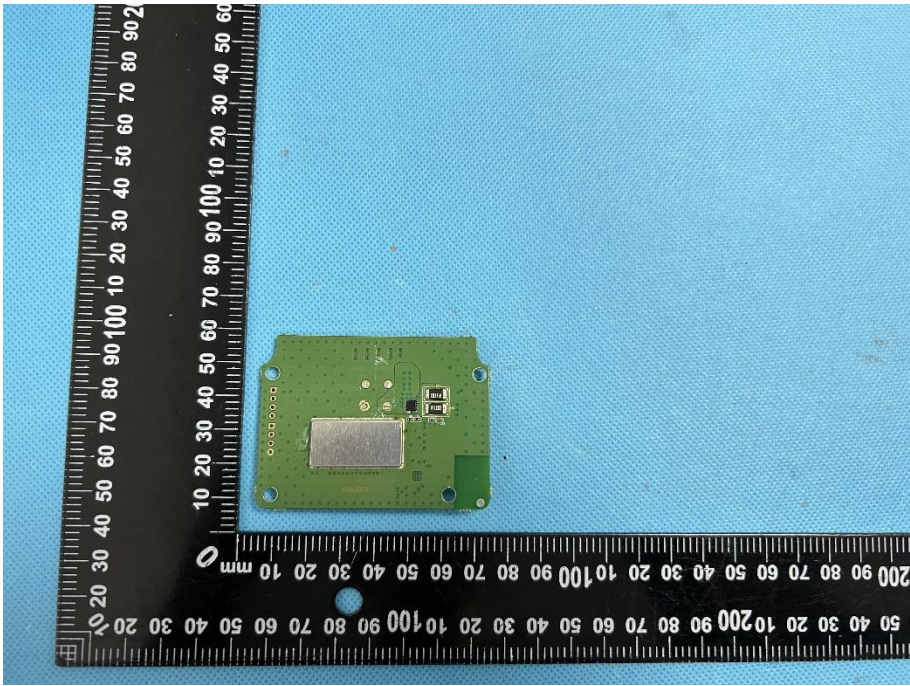

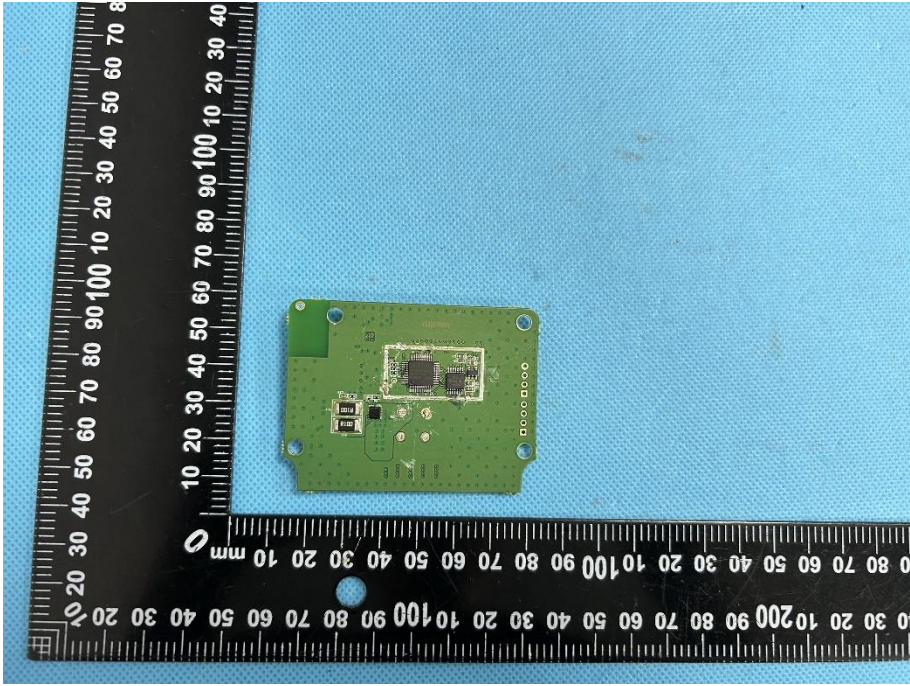

**Solder
Board-Component
View 1**

<p>Solder Board-Component View 2</p>	 A photograph of a green PCB component, likely a mobile phone component, placed on a blue textured surface. A black ruler with white markings is positioned to the left and bottom of the component for scale. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is rectangular with rounded corners and features a central silver-colored square component, several smaller components, and four circular mounting holes. The text 'MOBILE' is visible on the board.
<p>Solder Board-Component View 3</p>	 A photograph of the same green PCB component from a different perspective. A black ruler with white markings is positioned to the left and bottom of the component for scale. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is rectangular with rounded corners and features a central silver-colored square component, several smaller components, and four circular mounting holes. A black label with white text is attached to the top of the component, reading 'YC0002BA1' and '698-2690MHz'. The text 'MOBILE' is visible on the board.

<p>Solder Board-Component View 4</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'View 4'. The component is rectangular with a central square area containing a microchip. It has four circular mounting holes, one at each corner. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's width being approximately 60 mm and its height approximately 40 mm. The component is oriented vertically in the image.
<p>Solder Board-Component View 5</p>	 A photograph of the same green PCB component, labeled 'View 5'. This view shows the reverse side of the component. It features a large microchip in the center, a gold-colored pad on the left side, and various other components and traces. The board is placed on the same blue textured surface next to the same black ruler. The component's dimensions are consistent with View 4, approximately 60 mm wide and 40 mm high. The component is oriented vertically in the image.

<p>Solder Board-Component View 6</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled as View 6. The component is rectangular with rounded corners and features a large, square, silver-colored component in the center. It is placed on a blue textured surface next to a black L-shaped ruler for scale. The ruler shows measurements in millimeters, with the horizontal scale ranging from 0 to 100 mm and the vertical scale from 0 to 100 mm.</p>
<p>Solder Board-Component View 7</p>	 <p>A photograph of the same green PCB component, labeled as View 7. This view shows the reverse side of the component, revealing a central integrated circuit (IC) and various other components. It is placed on a blue textured surface next to a black L-shaped ruler for scale. The ruler shows measurements in millimeters, with the horizontal scale ranging from 0 to 100 mm and the vertical scale from 0 to 100 mm.</p>
