

Solder Board-Component View 6	 A photograph showing a small, square, dark-colored component mounted on a blue perforated metal surface. The component is positioned between two black rulers. The ruler on the left is marked from 0 to 100 mm, and the ruler on the right is marked from 0 to 80 mm. The component is approximately 20 mm wide and 15 mm high.
Solder Board-Component View 7	 A photograph showing a green printed circuit board (PCB) populated with various electronic components, including capacitors, resistors, and a transformer. The PCB is mounted on a blue perforated metal surface. It is positioned between two black rulers. The ruler on the left is marked from 0 to 100 mm, and the ruler on the right is marked from 0 to 80 mm. The PCB is approximately 100 mm wide and 60 mm high.

Solder Board-Component View 8	 A photograph of a green printed circuit board (PCB) populated with various electronic components, including resistors, capacitors, and integrated circuits. The board is positioned next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm horizontally and 0 to 80 mm vertically. The PCB is oriented vertically, with its longer edge parallel to the 0-100 mm ruler. The components are densely packed on the board, and the solder joints are visible.
Solder Board-Component View 9	 A photograph of a green printed circuit board (PCB) showing a circular component, likely a connector or a specialized IC, mounted on it. The component has several pins or contacts. The board is placed next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm horizontally and 0 to 50 mm vertically. The PCB is oriented horizontally, with its longer edge parallel to the 0-100 mm ruler. The component is centered on the board, and the solder joints are visible.

Solder Board-Component View 10	 A photograph showing a green circular printed circuit board (PCB) with various electronic components soldered onto it. The components include several surface-mount components, including what appear to be capacitors and resistors, and a central integrated circuit. The board is placed on a blue textured surface. A black ruler with white markings is positioned horizontally below the board, showing measurements in millimeters. The ruler markings range from 0 to 100 mm.
Antenna View	WCDMA/LTE Ant  A photograph showing the back of a white rectangular device, likely a mobile phone or a small electronic module. The device has a circular antenna protruding from the top. A red box highlights the antenna, and a red line points from the label "WCDMA/LTE Ant" to it. The device is placed on a blue textured surface. A black ruler with white markings is positioned horizontally below the device, showing measurements in millimeters. The ruler markings range from 0 to 100 mm.
