

The entry sensor can sense the door (window) opening information through the detach-attach movement of its body and magnet part, it can be used easily when attached anywhere.

Product installation

- 1 The back of Entry sensor has glue. When the Entry sensor is configured, tear off the glue protective film, and you can attach the sensor anywhere you want to install. It is better to attach it close to the hub and keep it away from magnetic field. (Such as substation equipment, satellite TV antennas, etc.)
- 2 You can judge the distance between the hub and the sensor to make sure communicate normally by opening and closing the Entry sensor and observing whether there is a corresponding opening/closed signal on the APP. If the hub is too far away from the sensor, it may cause communication failure.
- 3 Indoor use only.

Specifications

Name: Entry sensor
Item No.: Kit Pro-Door
Size: 45 x 24 x 12mm
Battery type: CR1632

Working temperature: 0~40 C / 32~104 F
Installation distance: <20mm
FCC ID : 2AJZ4-KPDR
IC : 23777-KPDR

FCC caution

Federal Communication Commission (FCC) Radiation Exposure Statement
When using the product, maintain a distance of 20cm from the body to ensure compliance with RF exposure requirements.

FCC statements:

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications or changes to this equipment. Such modifications or changes could void the user's authority to operate the equipment.

KIT PRO
Entry Sensor

Operation is Subject to the following two conditions:

(1) this device may not cause interference.

(2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence.

L'exploitation est autorisée aux deux conditions suivantes :

(1) l'appareil ne doit pas produire de brouillage, et

(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

This Class B digital apparatus complies with Canadian ICES-005.

Cet appareil numérique de la classe B est conforme à la norme NMB-005 du Canada.

When using the product, maintain a distance of 20cm from the body to ensure compliance with RF exposure requirements.

Lors de l'utilisation du produit, maintenez une distance de 20 cm du corps afin de vous conformer aux exigences en matière d'exposition aux RF.
