

Description of Permissive Change

The application is prepared for FCC class II permissive change. And the changes are list as below:

1. Adding frequency band through software enabling to its original parent application.

The adding frequency band is from 5.26 to 5.32GHz and 5.50 to 5.70GHz. Both devices, original and updated versions, are electrically identical in all aspects except enabling frequency bands of 5260 ~ 5320 MHz and 5500 ~ 5700MHz.

2. Adding a crystal (BTY2) and corresponding passive components (BC46, C208) in our platform for BTE. This RTC has nothing to do with BLE RF power, regardless of any BLE signal quality.
