

Hestan Smart Cooking Induction Module

FCC ID: 2AKFR-HSCIM1 - IC: 23696-HSCIM1

Statement regarding color discrepancy:

The discrepancy is only a change in the color of PCB material used and there is absolutely no change in PCB board impedance, circuit design, trace design, component placement and emission profile.

Brown color PCB was used for first articles to tell them apart and green color was used for production. It will remain green for all production runs.
