■ keyboard parameters

Working voltage	3.0V-4.2V
Boot current	≤190mA @3.4V
Charging	≤190mA @3.4V
Standby	≤1.5mA
Sleep time	30mins
Sleep current	0.1mA
Sleep wake-up	≤25mA
Shutdown	20UA
Battery capacity	280Mah
Charging time	≤ 4 hours
Standby time	≥ 365 days
Working current	Lighting up all LEDs working current 6.0mA, single-finger taps2.5mA
	Any key to wake up

■ Power saving sleep mode

When the keyboard does not have any operation command within 30 minutes, it will automatically enter the sleep mode. When you need to use it, you only need to press any key and wait for 4 seconds, the keyboard will wake up and the keyboard can work normally.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.
