■ Questions

1. Can iPhone and tablet PC both support the third inputting way?

When connect with IOS system, just support "simple pinyin" which build-in iPhone. Do not support Baidu ,sogou and wubi inputting way.

2. How to use "enter key "to send message?

WeChat --Me--settings-chant-enter key to send massage(turn on)
Found QQ settings in QQ --miscellaneous function--enter key to send massage(turn on)
Some kind of soft which are not update can not set enter-key to send massage.

3. How to deal with keyboard retard ?

When the keyboard are working and retard, first to check keyboard power, second to check whether there are too many connected equipment in your Bluetooth keyboard, third to check drive of computer.
