

C2PC permissive change letter

C2PC permissive change letter for certification of FCC ID: 2AKIT-CHC03

We, Lumi United Technology Co., Ltd, the undersigned hereby confirm that newest devices are completely identical with the previous certificated devices on physical characteristics. The only difference is that the newest device has updated its software and adds thread wireless function.

Section V of the 178919 D01 Permissive Change Policy document outlines guidelines for making software changes in compliance with FCC regulations.

Additional frequencies may be added by a Class II permissive change to an approved device under the following conditions. A new test report demonstrating compliance must always be submitted for the new frequencies of operation.

Requirement	Answers
No hardware changes have been made.	No hardware changes.
There is no increase in the output power rating on new frequencies (unless such exceptions are permitted by rules or KDB publications – see V) G))	Output power rating on new frequencies is lower than granted one.
The Equipment Class remains the same. (Changes that require a new Equipment Class code require a new grant of certification (FCC ID), except for SDR approvals.)	Equipment Class remains the same.
RF exposure changes must be addressed.	Submit new RF exposure report.
Only the original equipment manufacturer may implement the new frequencies.	Equipment manufacturer no change.
There are no other changes to the device that indicate a need for a new FCC ID.	No other changes.
