

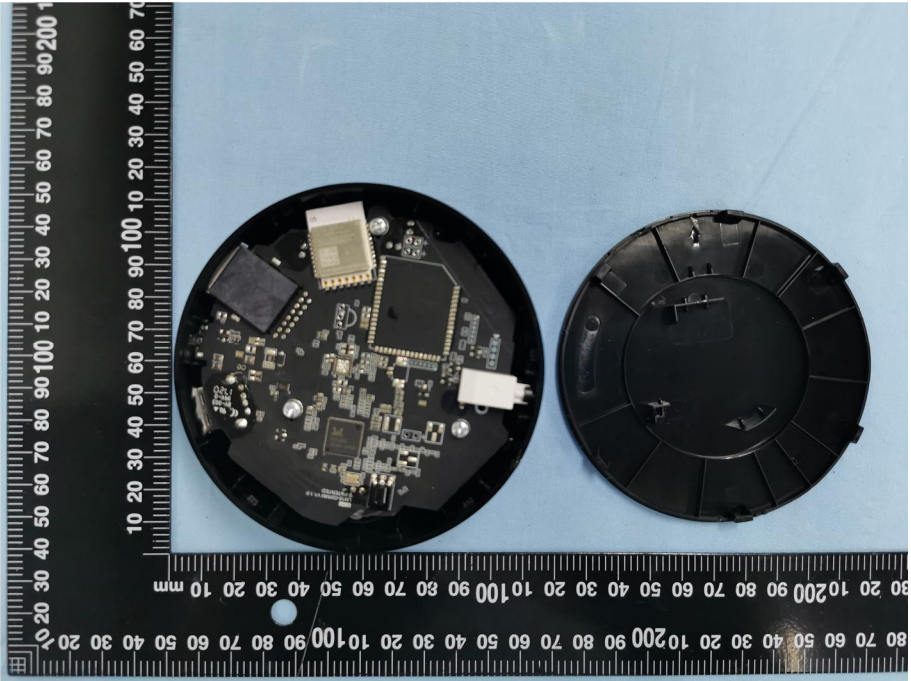

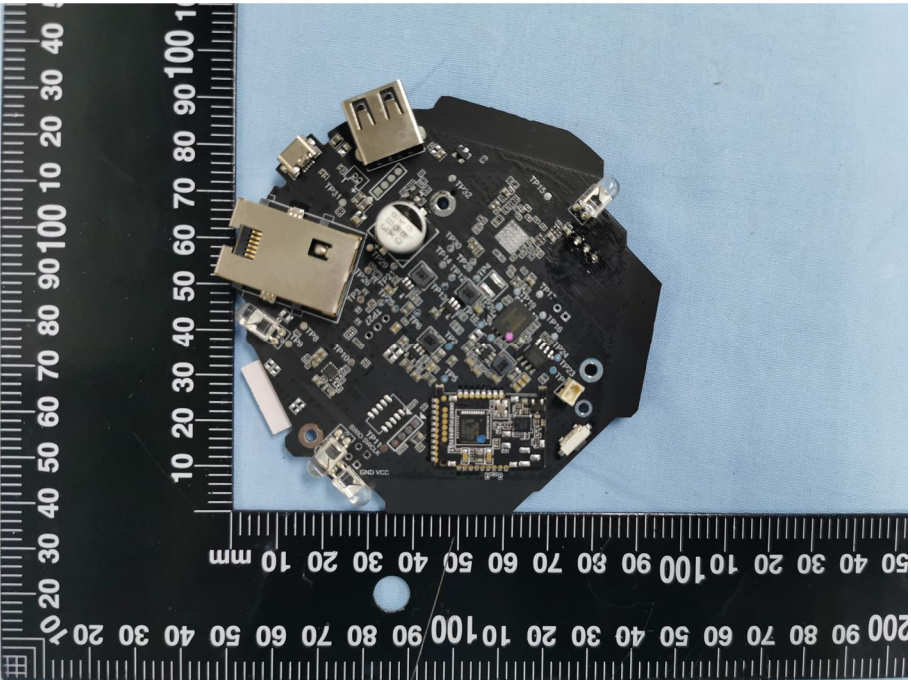

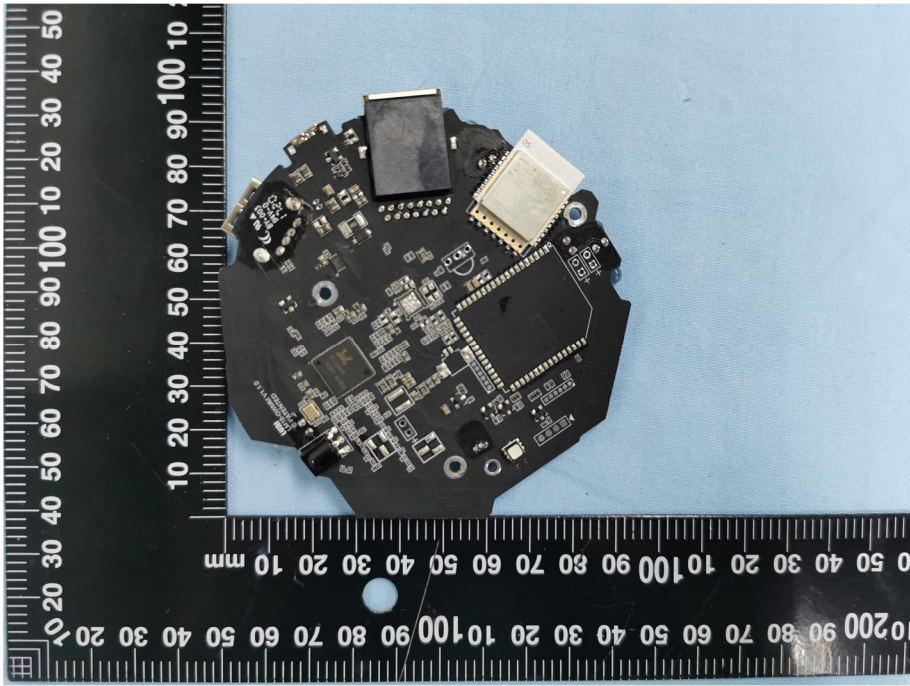

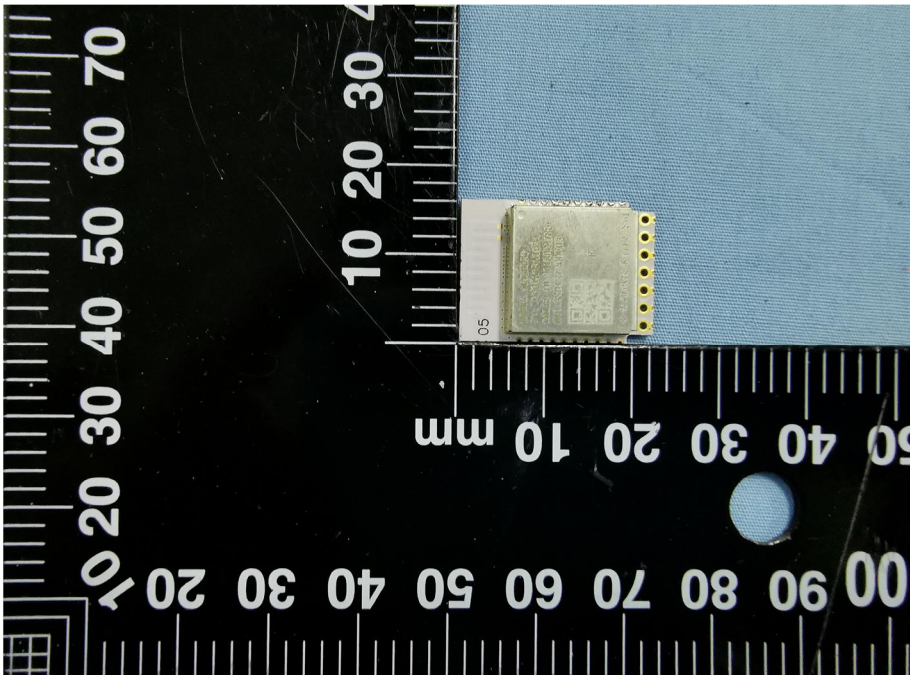

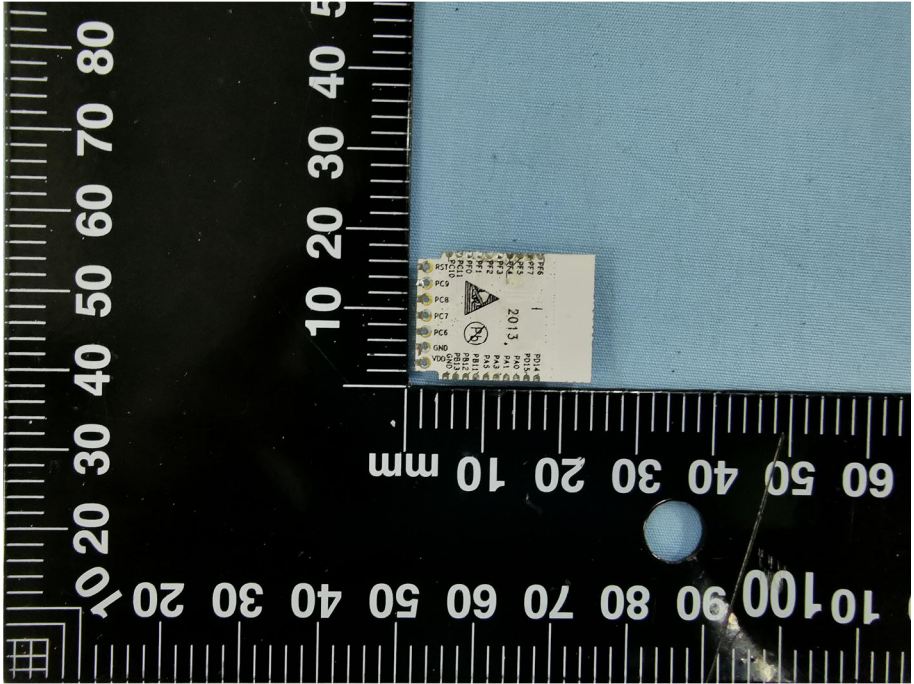

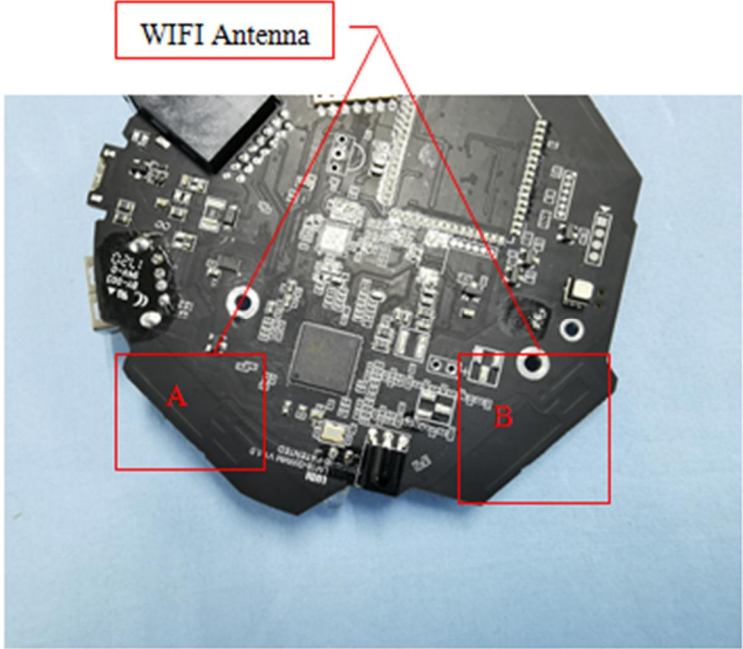

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p><b>EUT Housing and Board View 1</b></p>	 <p>This photograph shows the internal components of the EUT. On the left is a circular black plastic housing containing a printed circuit board (PCB) populated with various electronic components, including a microcontroller, memory chips, and connectors. On the right is the reverse side of the same housing, showing its internal structure. A black ruler with white markings is placed below the components for scale, showing measurements in millimeters.</p>
<p><b>Solder Board-Component View 1</b></p>	 <p>This photograph provides a close-up view of the PCB components. It shows a complex arrangement of surface-mounted components, including a microcontroller, various resistors, capacitors, and connectors. A black ruler with white markings is placed to the left of the board for scale, showing measurements in millimeters.</p>

<p style="text-align: center;"><b>Solder Board-Component View 2</b></p>	 A photograph showing a circular printed circuit board (PCB) with various electronic components. A black ruler with white markings is placed vertically to the left of the board for scale. The ruler shows markings from 0 to 100 millimeters. The board is dark-colored and populated with numerous small components, including a large square component at the top and a multi-pin connector on the right side.
<p style="text-align: center;"><b>Solder Board-Component View 3</b></p>	 A close-up photograph of a component on a PCB. The component is a square, gold-colored integrated circuit (IC) with several pins. A black ruler with white markings is placed vertically to the left of the component for scale. The ruler shows markings from 0 to 100 millimeters. The component is mounted on a dark PCB. The number '05' is visible on the component's surface.

<p style="text-align: center;"><b>Solder Board-Component View</b> 4</p>
