

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:  
 (1) This device may not cause harmful interference.  
 (2) This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential environment.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirements.

The device has been evaluated to meet general RF exposure requirements.

**RF exposure information:** The EIRP power of the device at maximal case is below the exempt condition, 20mW specified in EN62479:2010.

RF exposure assessment has been performed to prove that this unit will not generate the harmful EM emission above the reference level as specified in ICES Council Recommendation(1999/519/EC).

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20 cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The following items should be found inside the original packaging:

- The AMP 6500 POS terminal
- The Microfit cable
- Product Quick Reference Guide

## 1 Introduction

Engage customers in new ways with the AMP 6500's crystal-clear 5" color touch display and video capabilities. All while accepting payment options that appeal to them with signature capture, chip and PIN, NFC/contactless, smartphone payments, electronic wallets and tap-to-go compatibility. The Android OS and 4-core secure processor provide power and simple application development options to meet the most demanding needs of any multi-line or self-checkout environment. Optimized for the next generation of value-added services, gift card issuing and support of loyalty schemes, the AMP 6500 is the ultimate choice for a complete multimedia transaction solution.

## 2 AMP 6500 Architecture

### 2.1 Front View

1	Infrared LED
2	NFC keys
3	Camera
4	Infrared sensor
5	LCD
6	Magnetic stripe card
7	Antenna inductive zone
8	Waterproof ring
9	User smart card slot

### 2.2 Back View

1	Port cover
2	SIM/SAM card cover
3	Menu for setup
4	Reset
5	Tag label

### 2.3 Ports

1	USB - host
2	USB-device
3	RS232
4	Ethernet
5	Audio
6	MB8
7	Microfit

## 3 General Precautions

Basic care and consideration should be used when handling, operating or installing the 6500 terminal. This is a secure device, with both physical and logical tamper protection, and no attempt should be made by the user to open or service the device in any way other than approved troubleshooting methods. Keep these basic guidelines in mind to prolong the longevity and functionality of your product:

- Do not use the non-dedicated power supply, because it may be in trouble due to the mismatch of power.
- Do not vibrate, shake or knock the product sharply.
- When a fault occurs, immediately turn off the power supply and discontinue to use the product, please contact the service sector related to our company.
- Do not open and repair it by yourself!

When the terminal being attacked by unscrupulous environment (such as opening the terminal shell, etc.), the internal sensitive information stored in the terminal will be erased. For avoiding unnecessary trouble, you should not open the housing.

- AMP 6500 is designed to be unattended terminals, it is used outdoors. Please follow as below:
  1. The device should be covered by a pin shield over the pin entry area.
  2. Avoiding the direct sunlight and the rain.
  3. Place the device in a ventilated locality and keep good a heat dissipation condition.

## 4 Powering Device On/Off

### Powering On the device

First ensure that the plug is inserted into a known working socket, then insert the Microfit power or MB8 power jack into the power port on the 6500; the device will then power itself on.

### Powering Off the device

Unplug the DC Jack from the back of the terminal and it will power itself off.

## 5 Installing SIM/SAM/TF Card

### Installation of eSIM/SAM/TF card

- Open the rear cover to reveal the card slots
- With the exposed chip facing downward, use the angled corner oriented away from the slot, insert the card until it is seated right at the bottom of the slot.
- Ensure that any installed cards are securely locked in place, and close the rear cover

## 6 Troubleshooting Common Problems

If problems occur with the terminal, try these simple troubleshooting methods to correct the fault, or contact a service representative to further diagnose the issue.

Problem	Troubleshooting
Nothing displayed on screen	Ensure the power is properly connected at the socket and DC Jack
Unable to read card	Ensure that the file is free of dirt or foreign objects Swipe the card in both directions, and check if error has been corrected Check if the current card is operational and test with a different card
Magnetic reader data read error	Swipe the card with constant speed, right to the bottom edge of the slot Ensure the card strip is facing the screen and aligned properly with the slot Try swiping the card in the opposite direction
Chip card data read error	Ensure the chip reader is being updated, and is properly inserted into the slot Check the card for excessive scratches, dirt or other damage
Contactless card data read error	Confirm that the card supports contactless communication Check whether the card is properly aligned above the contactless reader area
Communication error	Restart the terminal in order to re-establish communications Confirm that the SIM card is properly installed, and that its contacts are clean If using WiFi, check that the terminal's connection is enabled

If problems persist after completing these troubleshooting procedures, please contact your sales or service representative. Do not attempt to open the terminal or make further repairs. **CAUTION RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS**

## 7 Technical Specifications

The following are specifications detailing the overall capabilities of the AMP 6500, including optional or available elements. To obtain the specifications for your individual terminals, refer to the original sales order or your sales representative for more information.

<b>PROCESSOR</b>	High Performance 4-Core Processor + Secure CPU
<b>MEMORY</b>	1GB RAM, 16GB flash memory, Support Micro TF Card, up to 32GB
<b>DISPLAY</b>	5" 720x 1280 pixels, support capacitive touch screen
<b>CONNECTIVITY</b>	RS232, Ethernet, 10/100M, WIFI
<b>CERTIFICATION</b>	PCI PTS S.A, EMI, Level 3,2, EMI, Conduction, CE, FCC, Psp Pass
<b>CARD READERS</b>	Full-featured in-built magnetic reader, Inbuilt smart card, NFC, 13.56MHz, read, write
<b>OTHER</b>	1. SAM, 1 TF card reader, MB8 interface, Microfit port, proximity detector
<b>SECURITY</b>	3DES Encryption, remote key injection, MasterSession and DUMPF Key Management
<b>POWER</b>	1.2A DC 2A (when using Micro fit), 2A - 4.5V DC (when using MB8)
<b>PHYSICAL</b>	198x122x48mm/7.74x4.81x1.89"inch
<b>SYSTEM</b>	1 key for reset, 1 key for setup
<b>BUTTONS</b>	Android OS 5.X
<b>WEIGHT</b>	720g (1.6lb)
<b>OPERATION</b>	-20°C ~ 45°C/°F ~ 13°F/19° ~ 50% (non-condense)
<b>STORAGE</b>	-25°C ~ 75°C/°F ~ 13°F/159° ~ 159°F (non-condense)
<b>WATERPROOF</b>	IP65
<b>PROTECTION</b>	IP68
<b>MODULATION</b>	NFC 13.56MHz
<b>Regulatory Conformance</b>	

Herby, Advanced Mobile Payment Inc. declares that the radio equipment type (AMP 6500) is in compliance with Directive 2014/53/EU

The full text of the EU Declaration of Conformity is available on our website: [www.ambipayment.com](http://www.ambipayment.com)
