Information FCC / IC

This device complies with part 15 of the FCC Rules and Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:

(1) This device may not cause interference, and
(2) this device must accept any interference, including interference that may cause undesired operation.

Modifications not expressly approved by NEEO AG could void the user's authority to operate this equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

2. Access to the required information on the e-label

1) Users can access the information in no more than three steps in a device's menu. The actual steps are:

   To access the e-label information, in the device:

   Step 1 – Go to Settings
   Step 2 – About (icon top right corner)
   Step 3 - Regulatory

No special access codes or permissions are required to go through the above steps.

2) The information is stored on the device, so no special accessories or supplemental plug-ins are required to access the information.

   Yes

3) Users are provided specific instruction on how to access the information.

   The information to the user is provided in the NEEO packaging.
   The printed link neeo.com/fcc-ic will forward the user to all information.

3. Labeling for Importation and Purchasing

1) Products utilizing e-labels are required to have a physical label on the product at the time of importation, marketing and sales. For devices in protective bags, a label on the bags is acceptable for this purpose. Any removable label shall be of a type intended to survive normal shipping and handling and must only be removed by the customer after purchase. For devices imported already in individual packages ready for sale, the information may alternatively be provided on the package. It shall contain:
   1) The FCC ID and/or the DoC logo (if applicable); and
   2) Any other information required by specific rule to be provided on the surface of the product unless such information is permitted to be included in the User's manual or other packaging inserts.

   The FCC ID and Logo is present on the production packaging.

4. Other considerations

1) The above information must be programmed by the responsible party and the information must be secured in such a manner that third-parties cannot modify it.

   The e-label information is pre-programmed by the grantee. The user cannot modify the e-label information.

2) All the applicable regulatory information required on the packaging or user instructions must be provided according to the rules even if it is displayed electronically.

   Yes, it is provided
