II . APP control:

Search "Tuya Smart" in the App Store and download the app;or scan the QR code below to download.

1. Distribution network:

For the first time, the device uses the app, it needs to be paired with the phone and the device. And before pairing, the device is made to enter the distribution network mode. The following is the way to enter the distribution network mode:

Press and hold the keys on the device for more than 5 seconds, the device enters the flash mode. The flash mode light for 0.5 seconds to flip once, the device enters into network mode. If the flashing speed is 2 seconds per every flip which means the user has entered the slow flashing mode, the user needs to press and hold the button for more than 5 seconds again to make the mode switch back to fast-flash mode. And then perform the following app distribution operations. (A long press will cause the mode to switch between fast and slow flash)

- 1, Open the "Tuya Smart" app, click on the upper right corner of the figure.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.
