- 5 preset TENS programs
- 2 preset EMS programs
- 2 preset Massage programs
- 15 intensity levels
- Rechargeable unit
- No wire electrode pad
- Wireless Bluetooth-enabled
- Mobile App-enabled

- Includes:**
- Wireless device with rechargeable lithium battery
 - 2 adhesive electrode pads (1 large and 1 small)
 - USB power cord
 - Instruction Manual
 - Quick Start Guide
 - Electrode Placement Guide

Manufactured for:
Shenzhen Dongdixin
Technology Co., LTD.

Model: IT300AB

The iSoothe® 3-in-1 Wireless Electrotherapy device features 3 clinically proven methods for total body well-being: A TENS module for pain relief, an EMS module for muscle conditioning/recovery and a Massage module for comfort and relaxation. This over-the-counter unit is compact, portable and wireless, allowing treatment from the convenience of your home or on the go with simple controls on the device or via mobile App.

- **5 Preset TENS Programs**
TENS (Transcutaneous Electrical Nerve Stimulation) is a clinically tested, non-invasive drug-free method for relieving chronic back, legs, arms, shoulders or muscle pain. It uses tiny electrical impulses sent through the skin to the nerves to relieve pain. TENS is highly recommended by medical professionals as a safe and effective means for pain management.
- **2 Preset EMS Programs**
EMS (Electrical Muscle Stimulation) works by sending gentle electrical impulses to the muscle, causing it to contract, mimicking physical exercise. This allows your muscle to exercise passively even when you are sedentary. EMS facilitates muscle performance, aids in strength training and recovery from minor injuries and post exercise.
- **2 Preset Massage Programs**
The massage stimulation program provides relaxing vibration to loosen tight muscles. It mimics massage to promote relaxation and reduce muscle tension - great for before or after a workout session as it helps to keep muscles from tightening.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
