

Circuit Description

IRADIMED CORPORATION

FCC ID: 2AKRU-IRM01

IC: 22312-IRM01

Device: 3881 ePOD (ECG POD)

Circuit Description: This device mostly transmits wireless vital sign data to the monitor. It acquires analog ECG signals from a subject, filters, and converts from analog-to-digital, and ultimately transmits this data over a wireless link to the monitor. The ePOD also seldomly receives data from the monitor when user settings are modified.
