

Circuit Description

IRADIMED CORPORATION

FCC ID: 2AKRU-IRM00

IC: 223412-IRM00

Device: 3880 Monitor

Circuit Description: This device mostly receives wireless data from two sources (ECG and SpO2 PODs). This data contains vital sign waveform and numerics relevant to the specific vital sign being measured. The monitor displays the data graphically and numerically on the LCD screen for user interpretation. The monitor also seldomly transmits data back to the PODs when user settings are modified.
