

SwitchBot Blind Tilt

User Manual

Please read this user manual carefully before using your device.

Package Contents

List of Components

Preparation

You will need:

- A smartphone or tablet using Bluetooth 4.2 or later.
- The latest version of our app, downloadable via the Apple App Store or Google Play Store.
- A SwitchBot account, you can register via our app or sign in to your account directly if you already have one.

Please note: If you intend to use the Cloud Service feature, you will need a SwitchBot Hub Mini (sold separately).

Safety Information

- Keep your device away from heat and humidity, and make sure it does not come into contact with fire or water.
- This product is a precision-based electronic product, please avoid physical damage.
- Do not attempt to disassemble, repair, or modify the product.
- Do not use the product where wireless devices are not allowed.

Installation

Step 1: Add your Blind Tilt to the SwitchBot app

Open the SwitchBot app and sign in to your account. Tap "+" at the top right of the home page, find the Blind Tilt icon and select, then follow the instructions to add your device.

Step 2: Install on your blind

Use the alignment sticker to determine a rubber adapter for your blind wand

① Wrap the alignment sticker around your blind wand and tuck the narrower end of the sticker into the gap on the other end. Slide the narrower end through the gap so the sticker tightly fits the wand. Now check which size the marks on the sticker indicates - S, M, L or XL.

② Select the rubber adapter of the right size according to the result above.

Attach the rubber adapter to your blind wand

① Stick the wider end of the alignment sticker onto the headrail on the left of the wand tilt, with the bottom edge of the rectangular area aligned with the bottom edge of the headrail.

② Pull the rest part of the alignment sticker down straight along the wand. Mark the corresponding position on the wand of where the sticker ends. This should be the top position of the rubber adapter.

③ Peel off the inner tape liner of the adapter and wrap it around your blind wand. Hold and pinch it for around 30 seconds. You can remove the alignment sticker now.

Attach the coupling onto the rubber adapter

① Open the coupling and attach it onto the rubber adapter, then pinch and fasten the spring buckle.

② Twist the coupling against the wand and make sure there is no relative sliding between the coupling and the adapter.

Note: If the coupling slides over the adapter when you twist it, use the alignment sticker to measure your blind wand again and replace with a more suitable adapter.

Connect the Solar Panel to the main unit via the Type-C connector

① Align the small bar on the spin buckle with the hollow circle mark on the main unit, then plug the Solar Panel into the main unit via the Type-C connector.

② Turn the spin buckle clockwise to lock the connection point.

③ Check if the connection is secure. The small bar on the spin buckle should point to the solid circle mark when the spin buckle is locked.

Note: Make sure the spin buckle is securely locked to prevent dropping at a later time.

Install the main unit of your Blind Tilt onto the wand

① Push the slide switch on the main unit upwards to open the case.

② Hold the main unit on the left of the wand. Align the gears on the coupling and inside the main unit, then close the main unit case.

Install the cord holder and anchor the Solar Panel

① Hold the main unit on the left of the wand and keep it perpendicular to the ground. Pull the cord of the Solar Panel straight up. Where the cord goes on the headrail would be the right clip position of the cord holder.

② Peel off the tape liner on the cord holder's back, stick it to the headrail, then press for about 10 seconds to secure it. You may also choose to secure the cord holder using screws.

③ Clip the cord of the Solar Panel into the cord holder from right to left.

Stick the Solar Panel onto the window

① Pass the Solar Panel through the gap between the headrail and the top slat.

Note: Make sure the Solar Panel passes from the gap above the top slat, otherwise your device may not work properly after installation.

② Stick the Solar Panel onto the inner side of your window with its front facing outside. Select an appropriate position near the main unit so that the cord connecting the Solar Panel will not be pulled when you open the window.

After finishing the installation steps above, adjust the cord of the Solar Panel to make sure your Blind Tilt main unit and the wand are perpendicular to the ground, and the cord does not affect the movement of slats.

Step 3: Calibration

After you have added and installed your SwitchBot Blind Tilt, you will need to calibrate it to ensure it works correctly. Please follow the instructions in our app and make sure that the actual movement of your blind slats is the same as the animation in our app. A recalibration is needed each time you remove and re-install the main unit. You can choose to recalibrate your Blind Tilt whenever you want on its Settings page.

Precautions

1. This product is not a toy. Keep children away from this product.
2. This product is only for indoor use. Please do not use this product in humid environment or outdoors.
3. Do not expose this product to liquids or operate with wet hands.
4. Do not place this product near heat sources in a closed environment.
5. Do not attempt to disassemble, modify or repair this product, unless by an authorized technician.
6. This product is designed to improve the convenience of home life. We do not account for any risks or property loss as possible results of not following this user manual.

Battery Replacement

It takes about 6.5 hours to fully charge your device battery and one full charge could last for about 10 months. You may also harness the sunlight to charge using the Solar Panel provided.

1. Use a 5V=1A adapter to charge your device.
2. Battery life is tested under conditions of opening and closing a 1.8 × 1.8 m blind with a 0.6 kgf.cm wand twice a day under 25 °C. Actual battery life may vary depending on different conditions.
3. Using Solar Panel to charge requires a level 6 illuminance level at least.

Note: Solar charging can get you unlimited battery life of your device. Under extreme conditions, like continuous cloudy days for years, the Solar Panel and the battery can last at least 3 years before next charging.

Resetting Factory Settings

Use the ejection pin to poke the Reset button once to reset your device to factory settings. Recalibration is needed after resetting.

Firmware Upgrades

In order to improve user experience, we will regularly release firmware updates to introduce new functions and solve any software defects that may occur during usage. When a new firmware version is available, we will send an upgrade notification to your account via our app. When upgrading, please make sure your product has sufficient battery and make sure your smartphone is within range to prevent interference.

Specifications

Model: W2701600
Color: White
Material: ABS, UV-resistant coating
Size: 48.8 × 29.2 × 144.2 mm (1.9 × 1.1 × 5.7 in.)
Weight: 130 g (4.6 oz.)
Power: Type-C, DC 5V=1A; 2000 mAh lithium battery
Battery Life: Approx. 10 months or almost unlimited with the Solar Panel
Operating Temperature: -10 °C to 45 °C (14 °F to 113 °F)
Operating Humidity: 10 % to 95 % RH
Torque Strength: ≤ 1 kgf.cm
Network Connectivity: Bluetooth 5.0
System Requirements: iOS 11.0+, Android OS 5.0+

Warranty

We warrant to the original owner of the product that the product will be free from defects in materials and workmanship. Please note that this limited warranty does not cover:

1. Products submitted beyond the original limited warranty period.
2. Products on which repairs or modifying have been attempted.
3. Products subjected to falls, extreme temperatures, water, or other operating conditions outside the product specifications.
4. Damage due to natural disaster (including but not limited to lightning, flood, tornado, earthquake, or hurricane, etc.).
5. Damage due to misuse, abuse, negligence or casualty (e.g. fire).
6. Other damage that is not attributable to defects in the manufacture of product materials.
7. Products purchased from unauthorized resellers.
8. Consumable parts (including but not limited to batteries).
9. Natural wear of the product.

CE/UKCA Warning

To comply with RF exposure requirements, a minimum separation distance of 20 cm must be maintained between the user's body and the device, including the antenna. Use only the supplied or an approved antenna. This device is in compliance with the essential requirements and other relevant provisions of directive 2014/53/EU. All essential radio test suites have been carried out.

CE DOC

Hereby, Woan Technology (Shenzhen) Co., Ltd. declares that the radio equipment type W2701600 is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: support.switch-bot.com

UKCA DOC

Hereby, Woan Technology (Shenzhen) Co., Ltd. declares that the radio equipment type W2701600 is in compliance with UK Radio Equipment Regulations (SI 2017/1206). The full text of the UK declaration of conformity is available at the following internet address: support.switch-bot.com

This product can be used in EU member states and UK.

Manufacturer: Woan Technology (Shenzhen) Co., Ltd.
Address: Room 1101, Qiancheng Commercial Center, No. 5 Haicheng Road, Mabu Community, Xixiang Subdistrict, Bao'an District, Shenzhen, Guangdong, P.R.China, 518100

EU Importer Name: Amazon Services Europe
Importer Address: 38 Avenue John F Kennedy, L-1855 Luxembourg

Operation frequency
BLE: 2402 MHz to 2480 MHz
Operation temperature: -10 °C to 45 °C

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference.
(2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20 cm between the radiator and your body.

IC Warning

This device contains license-exempt transmitter(s)/ receiver(s) that comply with Innovation, Science and Economic Development Canada's license-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- (1) L'appareil ne doit pas produire de brouillage.
- (2) L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

IC Radiation Exposure Statement

This equipment complies with the IC radiation exposure limits established for uncontrolled environment. This equipment must be installed and operated at least 20 cm from a radiator or your body. Cet équipement est conforme aux limites d'exposition aux rayonnements de la IC établies pour un environnement non contrôlé. Cet équipement doit être installé et fonctionner à au moins 20cmde distance d'un radiateur ou de votre corps.
