Federal Communications Commission  
Mills Road  
7345 Oakland  
Columbia MD 21046

We, the undersigned, are requesting, that the following radio equipment be granted a Class II permissive change:

Applicant : Opus Wearables LLC of Washington  
FCC ID : 2AKXS-EJGKAJ3531  
Model : ATWINC1500-MR210PB, REDUCED POWER

The change being made is a reduction in transmit power. This was done by reducing the software calibration table. The reason for the change was to improve EVM performance of the transmitter and to justify SAR exclusion. The 802.11 module in this application transmits with the antenna about 1 cm from the body, but at a low duty cycle of 3 Mbyte per ten minutes.

Modjoul INC is the company name currently in use. Opus Wearables was the original company name, but this was changed due to a naming conflict with another organization and the company was incorporated earlier this year.

Sincerely,

*R. Eric Mautz*
