RE: CONFIDENTIALITY REQUEST FOR Surface-restoration grinder / RG 130 ECI #
2AL2E-RG130#
To Whom It May Concern:

This letter serves as an official request for confidentiality under sections 0.457 and 0.459 of CFR 47. We have requested that the Block Diagram, Schematics, Parts List / Tune Up Procedure, Operational Description, SDR Software / Security Info required to be submitted with this application be permanently withheld from public review.

These documents contain detailed system and equipment description and related information about the product which Festool GmbH considers to be proprietary, confidential and a custom design and otherwise would not release to the general public. Since the design is a basis from which future technological products will evolve, Festool GmbH considers that this information would be of benefit to its competitors and that the disclosure of the information in these documents would give competitors an unfair advantage in the market.

Please contact me if there is any information you may need.

Sincerely,

i.A. Denis Drobner
