

Label Location Justification Letter

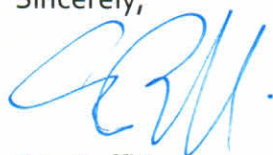

Subject: FCC and IC Label Location

To Whom It May Concern,

With regards to the label location for Tag FCCID: 2AL2U-ET2000150 and IC: 22807-ET2000150.

The device being certified is a paper thin, small tag transmitter that is rolled up and inserted into a standard medication capsule. The capsule is too small and it would be of limited use to have the FCC/IC ID's on the tag or capsule. Our plan is to provide the ID's in 2 locations, one on the bulk packages of the capsules supplied to the pharmacy or medication manufacturer and in the end user information manual. Among the exhibits with this filing will be label samples, and the user manual.

Sincerely,

A handwritten signature in blue ink, appearing to read "EBuffkin".
