## 5.2 Capture mode

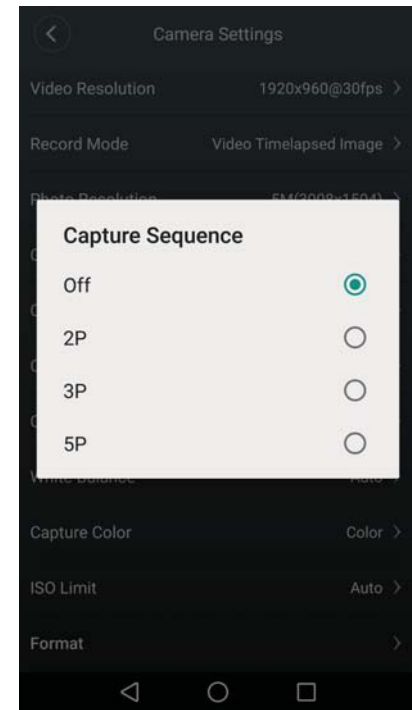

4 capture modes

Capture by timer → Capture Timer

Loop capture → Capture auto

Capture Sequence

## 6. Specifications

Items	Specifications
CPU	ARM Cortex A5
System	Apply to Android / Windows / iOS / MAC
Photo/Video Resolution	1920 x 960 @ 30 fps
Photo/Video file type	H.264, JPG
DDR FLASH	1Gb + 128Mb
CAM Sensor	2 x 4MP OV4689 210°fisheye Lenses
Wireless connection	Wi-Fi Dual mode: AP, STA
Wired connection	Type C
Battery	1100mAh, around 2 hours working time
I/O ports	1 x TF slot, 1 x Type C
Buttons	Shutter, WIFI key, Reset, Power on/Mode
Screw	1/4 inch, 1/4-20UNC, US Standard

### ***FCC Notice***

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
