**Getting started**

Go to [www.thomson.com](#) for more information on your Thomson Frame photo frame.

If you are new to using Thomson, then visit [www.thomson.com](#) for the Thomson quick setup or [www.thomson.com](#) for more information on how to use your Frame.

Once you have set up your Thomson Frame, you can start connecting it to your friends and family.

**Frameo app**

Download the Frameo app for your phone, use the Frameo app for iOS or Android.

**Video tutorials**

Watch our 'How to' videos, 'How to' guides or YouTube with information videos where you can see how to get started using Thomson. Scan the code to the right to see the full range of videos.

**Frameo quick setup**

When setting up your Frame for the first time, you will need to set up the frame.

- Select a language. This will be the language used on the Frame.
- Connect your frame to the internet by connecting it to Wi-Fi.
- Select or connect friends and family.

• Frameo may only work on certain mobile devices. It is recommended to update your phone before connecting to the Frame.

• Do not connect your phone to the Frame when you have a low battery, low signal, or are in a 'low power' mode. If you are in a 'low power' mode, you may not be able to connect to the Frame.

**Start using Frameo**

The first step is to connect Frameo with your friends and family by providing them with their phone number.

If you want to add a new friend to the Frame, you can do this by downloading the app for iOS or Android. Once you have downloaded the app, you can use the QR code to connect your phone and app as described below.

**Connecting a new friend**

Open the Frameo app on your phone and install the Frameo app. Once you have installed the app, you will see a QR code. Show this code to your friend. A dialog will appear showing a connection code which will be visible to them.

Once your friend has added the code to their phone, they will automatically connect to your frame and be able to send you photos.

Next, you can connect to other friends and family. To do this, you can use the QR code or the connection code as described above.

**Navigating your Frameo**

Tap the home button on the bottom of the frame to access the menu. Tap on the screen to see the menu, simply tap once on the screen.

**Adjust photo**

Move the photo to adjust the position of the photo in the frame. To adjust the photo, tap on the photo and drag the photo to the desired position. To zoom in or out, tap on the photo and drag the photo to the desired position. To rotate the photo, tap on the photo and drag the photo to the desired position.

**Navigating your Frameo**

Tap the home button on the bottom of the frame to access the menu. Tap on the screen to see the menu, simply tap once on the screen.

**External storage menu**

When connecting an external storage device, a menu will automatically appear on the screen. Tap on the menu to see the options. To connect to the external storage, tap on the menu to see the options. To disconnect from the external storage, tap on the menu to see the options.

**Check and Weather widgets**

The weather and clock widgets will appear in the upper right corner of the frame when the frame has received at least one photo. Tapping either of these will open the weather menu.

**Weather menu**

The weather menu includes: Place details, weather forecasts, and has shortcuts to weather-related settings.

**1 DAY**

1-day forecast, which includes weather conditions for the next 24 hours.

**4 DAY**

4-day forecast. Tap to see the weather forecast for the next four days.

**Settings**

Through the settings, you can personalize your frame to your needs.

**My frame**

Changes the name of your frame. This is also the name that connected friends and family will see in their list of connected frames in the smartphone app.

**Frame location**

Changes the location of your frame. This is the location displayed on your friends and family list of connected frames, which can help to distinguish frames from each other.

**Set language**

Set the language used on the frame.

**Weather location**

Set the location for the frame's weather feature, ensuring that your frame displays the appropriate weather forecast for you.

**Temperature unit**

Toggle between the Fahrenheit and Celsius temperature scales.

**Date**

Set the date used on the frame.

**Time**

Set the time used on the frame.

**Time zone**

Set the time zone used on the frame.

**Set first day of week**

Set which day of the week is considered the first.

**Quick/Slow 24-hour forecast**

Quick and detailed, 24-hour time forecast.

**Warranty, Compliance, Support and Safety Information**

For more information regarding warranty, technical specifications, support and safety, please refer to the manual included in the package.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.ct.

This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body.
