

Difference Statement

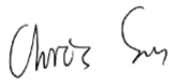

Model: EUCH15BYXXXXZZ-PS, MXW1016-LED15KXXXXYY

Where the Y represents CRI which can be used in one number; Where the XXXX represents the color temperature as four combination of numbers representing, such as "3065" means 3000K to 6500K range. For ZZ, it can be up to two characters, for customer use.

For XXXX, the first and second X represent CRI. The third and fourth X represent CCT which can be used in two numbers. For example, 5000K can be represented with 50. For YY, it can be up to two characters, for customer use.

And two series models are the same except the name. We chose EUCH15B93065-PS for testing.
