

Vintage Vinyl Quick Start Guide

Important Safety Instructions

Please read this Quick Start Guide carefully and save it for future reference.

What's in the Box

- 1 Vintage Vinyl Bluetooth® Speaker
- 1 power supply and wall extension cable
- 1 Quick Start Guide (this!)

Getting Started

The Vintage Vinyl Bluetooth® Speaker must be plugged into a power outlet to operate.

You can play music through the Vintage Vinyl Bluetooth® Speaker either via Bluetooth®, or via an aux line in cable (not included). The line in cable can be used with computers, CD players, or other non-Bluetooth® equipped items.

To use aux line in:

Plug one end of a 1/8th inch audio cable into your audio source and the other end into the aux in port on the back of your Vintage Vinyl Bluetooth® Speaker. Audio can be controlled either via the audio controls on the source or via the volume knob on the back of the speaker.

Bluetooth® Indicator Light Status

Connecting to Bluetooth®

The blue Bluetooth® Indicator Light in the middle of the rear record tells you the status of the Bluetooth® connection.

Quick flashing blue: The Bluetooth® is on and is ready to connect to a device

Solid Blue: The speaker is connected to a device via Bluetooth®

Slow flashing Blue: The aux in cable is being used. When the aux in is being used, the Bluetooth® will become unavailable.

When not connected to a device, the speaker is always discoverable as long as it's turned on via the on/off switch. Having the aux line cable plugged in will disable Bluetooth®.

On your device, go into the Bluetooth® settings and search for new devices. The Vintage Vinyl Bluetooth® Speaker should show up as "Sure HiFi." Select that to pair. Please refer to your device's user manual for more specific instructions.

You are now connected. You will be able to control the volume on both the speaker's volume knob and on your device.

To connect a new device to your Vintage Vinyl Bluetooth® Speaker, you must first unpair all other devices from the speaker. Only one device can be paired to the speaker at a time.

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth® SIG, Inc. and any use of such marks by Vinylux is under license. Other trademarks and trade names are those of their respective owners.

WARNINGS:

To reduce the risk of fire or electric shock, do not expose this product to rain or moisture.

Do not expose this apparatus to dripping or splashing, and do not place objects filled with liquids, such as vases, on or near the apparatus. As with any electronic products, use care not to spill liquids into any part of the product. Exposure to liquids may create a failure and/or fire hazard.

- Do not place naked flame sources, such as lighted candles, on or near the product.
- Do not subject to mechanical shock.
- Do not use any power supply other than that specifically provided for use with the equipment.

This product must be used indoors. It is neither designed nor tested for use outdoors, in recreational vehicles, or on boats.

- This product is intended to be used only with the power supply provided.
- This product contains no user serviceable parts.

CAUTION: Do not make unauthorized alterations to the product; doing so may compromise safety, regulatory compliance, system performance, and may void the warranty. Changes of Modifications to the Vintage Vinyl Bluetooth Speaker may void user's authority to operate the equipment.

WARNING: This product contains magnetic material. Contact your physician if you have questions on whether this might affect the operation of your implantable medical device.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
