## Casambi Technologies Oy Bertel Jungin Aukio 1 E, 02600 Espoo, Finland

## MODULAR APPROVAL LETTER

## FCC ID: 2ALA3-CBM003A

Modular Approval Requirement	Yes	No
(i)The radio elements of the modular transmitter must have their	$\checkmark$	
own shielding. The physical crystal and tuning capacitors may be		
located external to the shielded radio elements.		
(ii)The modular transmitter must have buffered modulation/data	$\checkmark$	
inputs (if such inputs are provided) to ensure that the module will		
comply with part 15 requirements under conditions of excessive		
data rates or over-modulation.		
(iii)The modular transmitter must have its own power supply	$\checkmark$	
regulation.		
(iv)The modular transmitter must comply with the antenna and	$\checkmark$	
transmission system requirements of §§15.203, 15.204(b) and		
15.204(c). The antenna must either be permanently attached or		
employ a "unique" antenna coupler (at all connections between		
the module and the antenna, including the cable). The		
"professional installation" provision of §15.203 is not applicable to		
modules but can apply to limited modular approvals under		
paragraph (b) of this section.		
(v)The modular transmitter must be tested in a stand-alone	$\checkmark$	
configuration.		
(vi)The modular transmitter must be equipped with either a	$\checkmark$	
permanently affixed label or must be capable of electronically		
displaying its FCC identification number.		
(VII)The modular transmitter must comply with any specific rules or	$\checkmark$	
operating requirements that ordinarily apply to a complete		
transmitter and the manufacturer must provide adequate		
instructions along with the module to explain any such		
requirements. A copy of these instructions must be included in the		
application for equipment authorization.		
(viii)The modular transmitter must comply with any applicable RF	$\checkmark$	
exposure requirements in its final configuration.		

## Sincerely, Casambi Technologies Oy
