USER MANUAL

table of Contents

1. PRECAUTIONS

1)、 On the Road

Using a device while driving is illegal in many countries. Please refrain from using yourmobile while driving.

2)、 Near Sensitive Electronics or Medical Equipment

Don't use your device near sensitive electronic equipment–particularly medical devices such as pacemakers – as it could cause them to malfunction. It can also interfere with the operationof fire detectors and other automatic–control equipment.

3)、 While Flying

Your device can cause interference with aircraft equipment. So it's essential you follow airline regulations. And if airline personnel ask you to switch off your device, or disable its wireless functions, please do as they say.

4)、 At a Petrol Station

Don't use your device at petrol stations. In fact, it's always best to switch off whenever you're nearfuels, chemicals or explosives.

5)、 Making Repairs

Never take your device apart. Please leave that to the professionals. Unauthorised repairs could break the terms of your warranty. Don't use your device if the antenna is damaged, as it could cause injury.

6)、 Around Children

Keep your mobile out of children's reach. It should never be used as a toy as this is hazardous.

7)、 Near Explosives

Turn off your device in or near areas where explosive materials are used. Always obey local laws and turn off your device when requested.

8)、**Emergency Calls**

To make an emergency call your device must be turned on and in an area where there's network coverage. Dial the national emergency number and press "Send". Explain exactly where you are and don't hang up until help has arrived.

9)、**Working Temperature**

The working temperature for the device is between 0 and 40 degree Celsius. Please don't use the device outside the range. Using the device under too high or too low temperature might cause problems. At very high volume, prolonged listening to a mobile device can damage your hearing.

2. PARTS AND BUTTONS OF THE DEVICE

1. Front camera
2. Receiver
3. Touchscreen
4. Volume button
5. Power button
6. Back button
7. Home button
8. App switch button
9. Micro USB and charging port
10. Earphone jack
11. Rear camera
12. Flash
13. Speaker
14. Microphone

3. TOUCH BUTTONS

The ◁ button moves back one step to the previous menu/page.

The ○ button returns immediately to the main screen.

The ▢ button displays a menu of recently opened applications. (This interface adds a "CLEAR ALL" button)

The ⊞ button will launch the applications and settings menu.
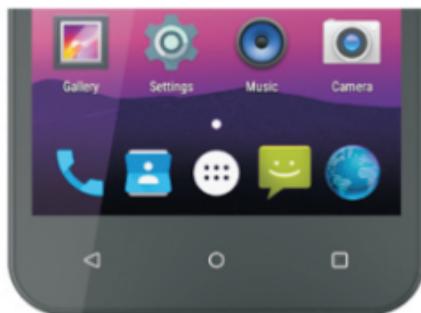

4. GETTING STARTED

Installingthe micro-SIM Card and Battery

Switch off your phone before installing or replacing the battery or the micro-SIM card.

7. SETTINGS MENU

The settings menu allows you to adjust Tablet cellphone System Confguration.

To Change Settings:

1. Touch the "Settings" menu icon 🔯 onthe Application menu. The Settings menu will open.
2. Touch a category title to view further options.

2. 1. Network&Internet

● Wi-Fi – Connect to/disconnect from wireless networks, view connection status

● Moblie network-Insert SIM card and switch data

network(2G/3G)

● Data usage – Enable/disable mobile data, view current usage, set mobile data limit

(note: this function is available only on devices supplied with 3G card functionality)

● Hotspot & tethering - Including Usb tethering, Blutooth tethering and Wi-Fi hotspot.

2. 2. **Connected devices**

● Bluetooth - Connect or disconnect Bluetooth devices .

● USB - Insert the USB line to use this menu.

2. 3. **Apps & notifications**

● Notifications – Adjust different notification settings

● App info – A list of all apps downloaded and running

● App permissions - View app permissions

● Battery – View the status of your battery and make adjustments to power consumption

2. 4. **Display** – Adjust display settings

2. 5. **Sound**– Adjust the different audio settings such as ringtones

2. 6. **Storage** – View your phone's internal and external storage settings

2. 7. **DuraSpeed** – "ON" / "OFF"

2. 8. **Security & location**

● Security-Adjust phone's security settings;

● location-'Change approximate location detection, improve search results, GPS satellites .

2. 9. **User & accounts**

● User-Switch between Owner and Guest;

● Accounts – Add or remove email and Google accounts such as Gmail, Google.

3**.** 0**.** **System**

● Language and input – add to the dictionary, edit on-screen keyboard settings, vocal search, etc.

● Date and time – Set date, time zone, time, clock format etc.

● Backup– Backup and restore data, perform factory reset, etc.

● Reset

● DRM reset

● Network setting reset-this will reset all network settings.

● Reset app perferences- reset all perferences.

● Schedule power on&off : Set the time to turn on or off your phone.

● About Phone – Displays information about your phone

● Suggestions - Set some functions and slide these functions to the right to remove this item.
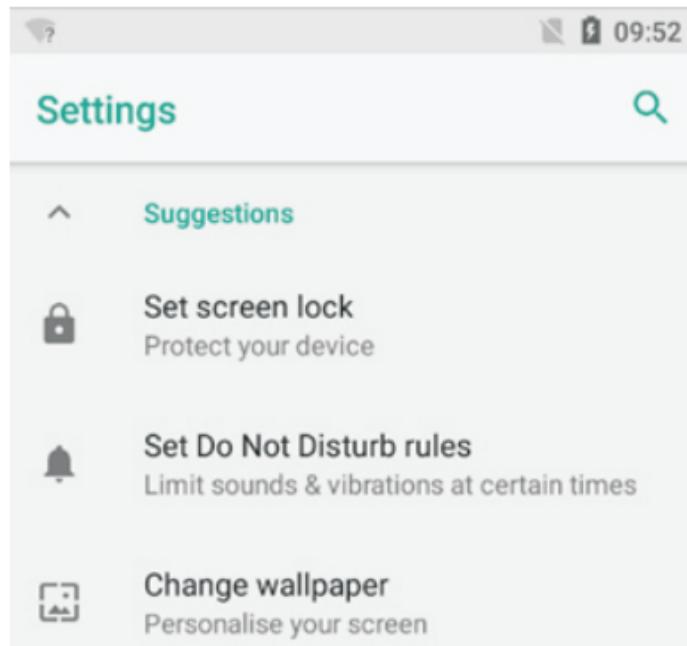

8. INSERTING/REMOVING SIM CARDS

1. When phone is powered off insert a SIM card by removing the SIM cover as illustrated above, insert your finger in the indent located near the charging port and unclip the SIM cover, then insert the SIM card. Please take note of the direction of insertion following the diagram on the phone's SIM port.

2. After inserting a SIM card, turn on the phone and wait a few minutes for your phone to display Network information.

Inserting TF Card :

NB: Please ensure when inserting an SD card your phone is powered "OFF"

1. Insert the TF card into the TF card slot located under the SIM card cover as explained in the Inserting/Removing SIM card section. Gently push TF card into slot until it clicksinto place.

2. A prompt will be seen on the screen saying "Preparing SD card".

Removing TF Card:

1. Close all applications and documents which have been opened from the TF card.

2. Select "Settings" and find "Storage" then click "Unmount SD card".

19.Split Screen Multitasking

Into an application, long press the APP SWITCH button can be divided into two screens, divided into two windows, each window can run a separate program, the two windows do not interfere with each other. (Few applications are not supported)
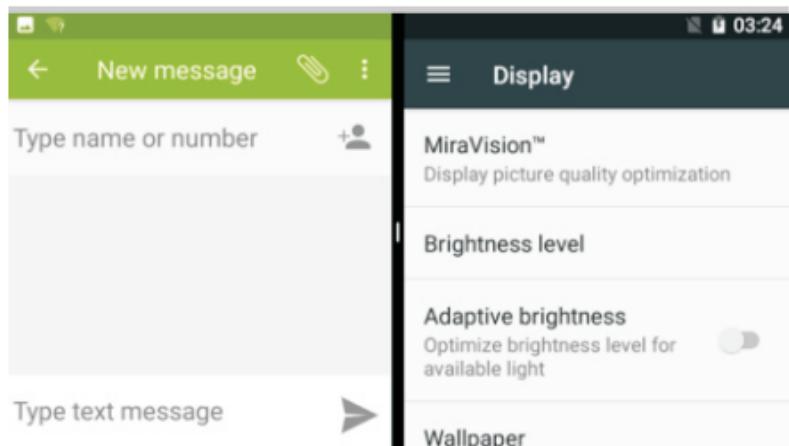

FCC RF EXPOSURE INFORMATION:

WARNING!! Read this information before using your phone

In August 1986 the Federal Communications Commission (FCC) of the United States with its action in Report and Outer FCC 96-326 adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards. Use only the supplied or an approved antenna. Unauthorized antennas modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

BODY-WORN OPERATION:

This device was tested for typical body-worn operations with the back/front of the phone kept 1cm from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 1cm must be maintained between the user's body and the back/front of the phone, including the antenna. Third-party belt-clips, holsters and similar accessories containing metallic components shall not be used. Body-worn accessories

that cannot maintain 1cm separation distance between the user's body and the back/front of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.

For more information about RF exposure, please visit the FCC website at www.fcc.gov

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for hand-held wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

<ANSIC95.1> (1992) / <NCRP Report 86> (1986) / <ICNIRP> (1999)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1). Nevertheless, we recommend that you use a hands-free kit with your phone (such as an earpiece or headset) to avoid potential exposure to RF energy. The design of your phone complies with the FCC guidelines (and those standards).

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

NORMAL POSITION:
Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

RF Exposure Information:
This product is compliance to FCC RF Exposure requirements and refers to FCC website https://apps.fcc.gov/oetcf/eas/reports/GenericSearch.cfm search for FCC ID: 2ALAS-C2

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help

Do not use the device with the environment which below minimum -10℃ or over maximum 40℃, the device may not work.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Ad Hoc function is supported but not able to operate on non-US frequencies.
