## §1.1307 (b) (1) \& §2.1091- MAXIMUM PERMISSIBLE EXPOSURE (MPE)

## Applicable Standard

According to FCC $\S 15.319$ (i) and $\S 1.1307(\mathrm{~b})(1)$, systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy level in excess of the Commission's guidelines.

Limits for Maximum Permissible Exposure (MPE) (§1.1310, §2.1091)

| Frequency <br> Range (MHz) | Electric Field <br> Strength (V/m) | Magnetic Field <br> Strength (A/m) | Power Density <br> $\left(\mathbf{m W} / \mathbf{c m}^{2}\right)$ | Averaging Time <br> (minute) |
| :---: | :---: | :---: | :---: | :---: |
| Limits for General Population/Uncontrolled Exposure |  |  |  |  |
| $0.3-1.34$ | 614 | 1.63 | $*(100)$ | 30 |
| $1.34-30$ | $842 / \mathrm{f}$ | $2.19 / \mathrm{f}$ | $*(180 / \mathrm{f} 21)$ | 30 |
| $30-300$ | 27.5 | 0.073 | 0.2 | 30 |
| $300-1500$ | $/$ | $/$ | $\mathrm{f} / 1500$ | 30 |
| $1500-100,000$ | $/$ | $/$ | 1.0 | 30 |

$\mathrm{f}=$ frequency in MHz

* = Plane-wave equivalent power density

## MPE Calculation

Predication of MPE limit at a given distance

$$
\mathrm{S}=\frac{P G}{4 \pi R^{2}}
$$

Where: $\mathrm{S}=$ power density (in appropriate units, e.g. $\mathrm{mW} / \mathrm{cm}^{2}$ );
$\mathrm{P}=$ power input to the antenna (in appropriate units, e.g., mW );
$\mathrm{G}=$ power gain of the antenna in the direction of interest relative to an isotropic radiator
$\mathrm{R}=$ distance to the center of radiation of the antenna (appropriate units, e.g., cm );
For worst case:

| Frequency (MHz) | Antenna Gain |  | Tune-up conducted power |  | Evaluation Distance (cm) | PowerDensity <br> $\left(\mathrm{mW} / \mathrm{cm}^{2}\right)$ | MPE Limit (mW/cm ${ }^{2}$ ) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | (dBi) | (numeric) | (dBm) | (mW) |  |  |  |
| 2402-2480 | 0 | 1 | 3.5 | 2.24 | 20 | 0.0004 | 1.0 |
| $\begin{gathered} \hline 1921.536 \\ - \\ 1928.448 \\ \hline \end{gathered}$ | 0 | 1 | 15.5 | 35.48 | 20 | 0.007 | 1.0 |

Considered the Bluetooth and DECT transmitting simultaneously:
The rate $=0.0004 / 1+0.007 / 1=0.0074<1.0$
Result: Compliance. To maintain compliance with the FCC's RF exposure guidelines, place the equipment at least 20 cm from nearby persons.
