Interchangeable strap
Your Tambour Horizon connected watch comes with an interchangeable strap: change your strap and your style with just a click.

Case, water-resistant to 30m

THURSDAY
06 JUL

24h bezel ring / Hybrid display
The 24-hour scale visible on the sapphire crystal of your watch lets you read information digitally indicated on the watch screen, such as a second time zone or the weather for a 24-hour period.

Crown
The crown allows you to manage several functions, including turning the watch on.

14

Turning your watch on and off

To turn on your watch, press and hold the crown for three seconds.

To turn off your watch, swipe down on the screen.
Select Settings (⚙), System (🕐), then Power Off (⏻).

Download the Louis Vuitton App application

Download and launch the Louis Vuitton App application to access exclusive content
(dials, features, Louis Vuitton applications, and more).

This application is available:
• on the App Store or Google Play Store for most users
• or, for users who have configured their watch in Simplified Chinese, on Tencent App Gem.

Recharge the battery

Connect the cable's USB port to the wall charger and plug the charger into a power source.

Position the charger on the back of your watch, on the side showing the logo $((\notdiv))$ (see illustration below).

The charger's internal magnets ensure that it is correctly positioned under the watch. When properly positioned, the charger should be perfectly flush with the watch. The charging screen appears on the watch once charging begins. Once the watch is sufficiently charged, it will turn on automatically.
