SKY

UNIVERSAL REMOTE

Best position for duplication

2-3 cm

Auto-scan Type
Multi-frequency
Face to face copy
Up to 4 different remotes in 1

PROGRAMMING:

-standard

1.Hold button 1 and   press button 2 four times ,then release both buttons, the led of SKY emits a quick flash every 2 sec.
2.Place and press the original remote control in front of the remote , at about 2-3 cm of distance,until the led of SKY starts flash quickly.
3.While the LED of SKY is flashing, press the button of the SKY where you want to store ,the remote'code just copied, until the led will turn off.
Note:
To duplicate a second button, repeat the operation from the point 1.

-BFT

1.Hold button 1 and press button 2 four times ,then release both buttons,the led of SKY emits a quick flash every 2 sec.
2.Place the original remote control in front of the remote, at about 2-3 cm of distance
3.Press and retain pressed the button of the original remote control that you want to copy until the remote's led will turn on with a fix light and then emits a double flash every 2 sec.
4.Transmit now the seed code of the original remote control (by pressing the rear hide button or the buttons 1 and 2 simultaneously in the new models)
5. Now the LED will flash quickly, press the button of the remote where you want to store the code just copied, until the LED will turn off.
6.Now activate the **AMC** procedure to insert the new remote control on the receiver.

-FAAC and GENIUS

ATTENTION, PLEASE: Verify that the remote control to be copied is a MASTER.
Pressing any button, the LED should issue a double flash rather than switch on immediately as a fixed light.
1.Hold button 1 and press button 2 four times
2.Place the original remote control in front of the remote, at about 2-3 cm of distance
3.Press and retain pressed the original remote control button that you want to copy until the LED SKY switches on a fixed light and then It stars to emit a double flash every 2 seconds.
4.Predispose the FAAC/GENIUS remote control for the emission of the seed code (by pressing simultaneously the buttons 2 and 3)
5.While the FAAC/GENIUS LED is flashing, place it in front of the SKY, at about 2-3 cm of distance and press the button that you want to copy until the remote's led will change frequency of flashing (faster than before), as confirm of the correct copy of the code.

-V2

1.Hold button 1 and press button 2 four times ,then release both buttons,the led of SKY emits a quick flash every 2 sec.
2.Place the original remote control in front of the remote, at about 2-3 cm of distance

3.Press and retain pressed the button of the original remote control that you want to copy until the remote's led will turn on with a fix light and then emits a double flash every 2 sec.
4.Press and retain pressed once again the same button of the original remote control.
6.Now the LED will flash quickly, press the button of the remote where you want to store the code just copied, until the LED will turn off.
5.Now activate the **AMC** procedure to insert the new remote control on the receiver.

Warning Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
